

CZAR CELEBRATES HIS BIRTHDAY IN SECLUSION

Official Observances Were As Usual But Popular Festivities Were Suppressed By The Police.

[SPECIAL TO THE GAZETTE.] St. Petersburg, May 18.—In the seclusion of the imperial palace at Peterhof, where he has taken up his residence for the summer, the czar passed his thirty-eighth birthday today. The customary official obser-

thanksgiving were held in the churches. Owing to the tendency of the authorities to suppress any public gathering or demonstration of what-soever character, there was no popular celebration of the day.

Biographical. Emperor Nicholas II. was born May 18, 1868, and succeeded his father, the late czar Alexander III., Novem-

SON OF THE CZAR. Only Male Heir of Russian Monarchy, Nicholas II.

ber 1, 1894. He is married to the Princess Alice (Alex) of Hesse-Darmstadt, daughter of the Princess Alice of Great Britain, and has four daughters and one son—Olga, born in 1895; Tatiana, born in 1897; Marie, born in 1899; Anastasia, born in 1901, and Alexis, the Czarvitch, born August 12, 1904.

ANARCHIST BERKMAN TO SPEND LIFE "EDUCATING"

Came Out Of Prison Today A Learned Man... Entered Fifteen Years Ago An Ignorant Disciple Of Violence.

[SPECIAL TO THE GAZETTE.] Pittsburgh, Pa., May 18.—After having served fourteen years and eight months for his attempt to assassinate Henry C. Frick, in July, 1892, Alexander Berkman, the anarchist, was released today from the Allegheny county workhouse. Berkman has been spoken of as the successor of the late Johann Most as the head of the anarchist propaganda in America. Just what his real plans are he refused to state today beyond saying that he is prepared to put in the rest of his life in educational work along anarchist lines. Mr. Frick, though he denies that he has any fear of further molestation from Berkman, has it is believed, taken steps to have the anarchist closely watched for a time at least.

afterwards United States minister to Turkey, came to the assistance of Mr. Frick and was himself stabbed by Berkman. Berkman was convicted and sentenced to fourteen years in the Riverside penitentiary. Upon the expiration of his sentence eight months ago he was transferred to the workhouse to serve a sentence on a minor charge in connection with the assault.

Studied in His Cell. Although not well educated when he entered the penitentiary, Berkman has acquired a considerable knowledge during his imprisonment. He is now able to keep books and handles the pen as well as the average citizen, if not better. He has been a most exemplary prisoner during the years he has spent behind the walls, and has studied unceasingly. He has perfected himself in several languages, French, Italian and the Slavonic. While he is believed to be as much of an anarchist as he was the day he attempted to assassinate Mr. Frick, it is the opinion of the prison officials that he is likely to confine his future activities to the advocacy of education rather than as an apostle of force.

NOT ONLY HORSES BUT ALSO DOGS ARE EATEN

The Funnyman's Sausage Joke Has Become A Reality In Germany Where Meat Is Scarce.

[SPECIAL TO THE GAZETTE.] Washington, D. C., May 18.—Consul Harris, of Mannheim, in a report to the state department on the price of food stuffs and the meat shortage in Germany, quotes an interesting article from a local newspaper on the increasing use of horse and dog meat. The article says, in part: "While the number of horses slaughtered in the fourth quarter of 1904 amounted to but 44,659, and in the first quarter of 1905 amounted to 35,966, it rose in the fourth quarter of 1905 to 52,554. Most of these horses were consumed in a few north German states. In Mecklenburg-Strelitz were slaughtered 29 steers, and 136 horses; in Mecklenburg-Schwerin 783 horses and only 256 steers. The number of horses slaughtered in south Germany is comparatively small, as also in

Saxony, where only about half as many horses as steers were consumed. On the other hand, in the matter of slaughtering dogs Saxony took second place with 1,464 head. "A similar condition was shown only in Anhalt with 153 dogs slaughtered for food. In the other German states this species of flesh is less valued. In Prussia only 526, in Bavaria 151, and in Baden 3 dogs were slaughtered in the last quarter of 1905. To be sure, here are reckoned only the common species of dogs, which under official inspection were compelled to give up their lives and allow themselves to be eaten. According to official records there were 2,405 dogs slaughtered during the fourth quarter of 1905, as against 1,762 during the same period of 1904."

SPARKS FROM THE WIRES

The President sent the nomination of Charles C. Houghton to the senate as district attorney for the district of Minnesota. Professor Guy A. Tawney, who has held the chair of mental science and philosophy at Beloit college, Wis., for several years, has resigned. John B. Jackson, American minister to Greece, entertained at dinner in Athens King George, Queen Olga, Crown Prince Constantine and the

Crown Princess and Prince George. In the absence of Vice President Fairbanks Senator Frye as president pro tem occupied the chair. The change was generally noticed, as this is the first time the vice president has been absent from his seat.

Dr. John J. Tigert, secretary of the general conference of the Methodist Episcopal church, south, was elected a bishop on the first ballot taken by the conference. No other bishop was elected on the first ballot.

THE NEVER ENDING TUG-OF-WAR

EXAMINATION WAIVED BY ARTHUR FARLEY

Trial of Young Man Charged With Embezzlement of Railroad Money Set for Thursday.

Arthur J. Farley, until recently the night operator for the C. & N. W. Ry. Co. at Tiffany, who was arrested here yesterday morning on the charge of appropriating to his own use the sum of \$30.24 belonging to the company, appeared in municipal court today and waived examination. His trial was set for Thursday morning, May 24.

DARING THIEF TOOK EVERYTHING HE SAW

Saw Ten-Thousand-Dollar Automobile and Rode Away With It in New York Today.

[BY ASSOCIATED PRESS.] New York, May 18.—A ten-thousand-dollar automobile containing \$2,400 worth of bonds, script and other valuable papers, was stolen early today by a daring thief who jumped into the machine while it stood unoccupied on Broadway near 42d street. Its owner, J. H. Clarke, an automobile manufacturer, had stepped into a restaurant nearby.

VALIDITY OF \$200 NOTE INVOLVED IN ACTION

Which Was Tried Before Judge Earle and Jury of Four This Afternoon.

Before Judge Earle and a jury of four in municipal court this afternoon the action of C. S. Jackson, trustee of the estate of the late W. T. Van Kirk, vs. J. E. Inman of the town of Bradford to recover on a \$200 note, was argued by attorneys W. G. Wheeler and M. O. Mount. The defendant claims that the original note was lost and a new one made out Nov. 18, 1904; that he satisfied the obligation and the new note was returned to him; and that the original note has since been found and that upon its action is being brought.

POPE SUSPENDS AUDIENCES OWING TO ATTACK OF GOUT

Rome, May 18.—The Pope has suspended his audiences owing to the fact that he is suffering from a slight attack of the gout.

STATE NOTES

C. R. Davis, an old settler and photographer, was found dead on the floor of his room at Eau Claire, and is believed to have been dead two days of heart failure. He was subject to fits. By the failure of the J. L. Gates Land company to pay for land descriptions to the amount of \$6,930.23 that their representative bid in on Tuesday, Treasurer Howland of Chippewa Falls resold them. A. J. McGilivray of Chippewa Falls and F. C. Allen of New York took most of the descriptions.

Frank Murray, a Milwaukee machinist, lay down upon the North-Western track at Racine and stopped two freight trains. There was a delay of twenty minutes until the police patrol could haul the man to jail. Mrs. Mary Sculz, who shot George Sawyer when he tried to break into her house, at a preliminary hearing before Justice Fox of Chilton, was put under \$2,000 bonds to appear at the next term of the Calumet county circuit court and stand trial on the charge of murder.

IT IS BELIEVED THE TRUTH HURT

INSURANCE COMMISSIONER'S DISCLOSURES OF SIGNIFICANCE.

HOST'S ATTACK WAS DIRECT

Question Whether It Will Help Davidson or Not Is Now Discussed.

[SPECIAL TO THE GAZETTE.] Madison, Wis., May 18.—Friends of Secretary of State Houser, against whom Insurance Commissioner Host made the charge before the legislative insurance investigating committee that Houser was the messenger of the Equitable Life Assurance society in the offer of a campaign contribution of \$2,000 in exchange for a favorable decision of the surplus distribution case, expect that the incident will not greatly injure the chances of Secretary Houser winning a nomination for a third term, but declare that the effect has already been to cause much adverse criticism to be made against the commissioner of insurance because he participated in the material benefits of the campaign that was waged by Secretary Houser and the La Follette faction, and two years later made a dramatic and sensational expose of the methods that were employed in the "half-breed" campaign. No one conversant with the situation seriously doubts that Commissioner Host told the story for purely political reasons, to exalt himself as incorruptible in politics, assist his friends, Governor Davidson and Senator Frear, secure the nomination of the deputy commissioner, T. M. Purtell, and pay Houser back for alleged opposition to Host's insurance bills in the state legislature a year ago. Notwithstanding the denial of Secretary Houser that he ever directly proposed that Commissioner Host render a decision in favor of the Equitable in exchange for a \$2,000 campaign fund contribution, it is quite generally believed that the testimony of Commissioner Host is substantially correct as a matter of fact. Outside of the close friends of Secretary Houser it is acknowledged that the exposure will injure the chances of Secretary of State Houser for a nomination for a third term, and leading administration republicans express regret that the matter became known, as it must cast dark suspicion and discredit upon the La Follette organization in this state.

SEVEN DROWNED; ENGLISH BOAT SANK

Accident Near Port Said, Egypt, in Which the Torpedo Boat Is Lost.

[BY ASSOCIATED PRESS.] Port Said, Egypt, May 18.—A British torpedo boat capsized off this port during the night. Seven of the crew were drowned.

LIGHTNING KILLED THIRTEEN MOURNERS

[BY ASSOCIATED PRESS.] Berlin, May 18.—Thirteen mourners at the graveside during a funeral at Teschen, Austrian Silesia, today were struck by lightning and killed. Twenty others were severely burned.

THE CHURCHES AND SOCIAL PROBLEMS

Subject of Pacific Coast Congregational Congress at Los Angeles Today.

[SPECIAL TO THE GAZETTE.] Los Angeles, Cal., May 18.—The churches and the social problems formed the general topic of discussion at the sessions of this, the third day of the Pacific Coast Congregational congress. In this connection the papers and discussions treated of various phases of charity and correction work and the relation of the church to the labor problem. Prominent among those taking part were Dr. Washington Gladden of Columbus, O., Rev. William Orr Wark of Bellingham, Wash., Rev. H. K. Booth of Sacramento, Rev. W. C. Kautner of Seattle, and Rev. E. I. Goshen of Salt Lake City.

EASTERN WISCONSIN ENDEAVORS MEET

Young People's Societies of Lake Shore District in Convention at Milwaukee.

[SPECIAL TO THE GAZETTE.] Milwaukee, Wis., May 18.—If a large attendance counts for success the present convention of the Eastern District of the Wisconsin Christian Endeavor society will be one of the best in the history of the organization. Scores of visitors are here to take part in the gathering, which formally opens in Calvary church tonight. Prominent speakers of Chicago and other cities will be heard tomorrow and Sunday, and in addition to these addresses the music will be a strong feature of the program.

Mississippi Travelers.

Vicksburg, Miss., May 18.—Vicksburg extended a royal welcome today to the delegates and other visitors who have flocked to the city for the annual session of the Mississippi grand council of the United Commercial Travelers. The convention was formally opened this morning with headquarters at the Carroll Hotel. A brief session was held for the reception of the officers' reports, appointment of committees and the transaction of other routine business, but the most of the day was given over to features of elaborate entertainment, provided by the local members of the organization. A trolley ride about the city was arranged for the ladies accompanying the delegates and this afternoon all the visitors were taken on a trip through the National Military Park. A grand ball is scheduled for this evening. The business of the convention will be concluded tomorrow.

SIXTEEN-YEAR-OLD BOY RUN OVER BY DISC-HARROW

Johnny Korth Miraculously Escaped Death Near Clinton, Monday.

Losing control of the four-horse team drawing the machine and falling from his seat, sixteen-year-old Johnny Korth was run over by a disc-harrow on the farm of Reynold Voez near Clinton last Monday. A cut four inches long was inflicted on the fleshy portion of one of his legs, but he miraculously escaped other injury. The young man was taken to the home of his mother, Mrs. John Mix, on North Church street, Clinton.

RAILROAD WAS MUCH SURPRISED

Pennsylvania Road Knew Nothing Of The Ownership Of Coal Lands By Employees.

TO BE INVESTIGATED IMMEDIATELY

First-Vice President Does Not Think The Public Have Been Inconvenienced By The Arrangement, Though.

[BY ASSOCIATED PRESS.] Philadelphia, May 18.—The following statement was issued today by John P. Green, first vice-president of the Pennsylvania Railroad company: "The recent developments at the hearing before the Interstate Commerce Commission, in respect to the acquisition and ownership of stocks in coal by the company and its officers and employees, and the acceptance of gratuities by its employees, are a surprise to the management. While it does not believe they have caused injustice to the public or the company the facts with respect thereto will be thoroughly investigated and no ownership or practice calculated in any manner to affect the full and impartial discharge of the duty owed by the company and its officers and employees to the public will be tolerated."

NAVY DEPARTMENT LEARNS OF ATTACK ON SAILORS

Cubans Go For Unarmed Sailors And Kill One And Wound Twenty-Two Others.

[BY ASSOCIATED PRESS.] Washington, May 18.—The navy department has received the first report of a serious fight which occurred at Guantanamo, Cuba, on April 29, between a party of American sailors and natives, in which one American was shot and twenty-two others injured. While the sailors were ashore at Guantanamo they left the naval reservation and were attacked by a large band of natives, who used knives and machetes with telling effect. The blue jackets had no weapons and although outnumbered three and four to one they fought with their fists until all were disabled. The local police, it is said, instead of attempting to quell the riot sided with the natives.

RATE BILL IN SENATE TODAY

TELLER AMENDMENT WITH SOME CHANGES ADOPTED.

SENATOR RAYNOR ON FLOOR

Claim Allison Court Review Amendment Has Destroyed Bill—Deplored President's Course.

[BY ASSOCIATED PRESS.] Washington, May 18.—When the railroad rate bill was taken up today the senate adopted the Teller amendment, striking out from the provision giving to the interstate commerce commission the power to prescribe rates, the words "in its judgment."

At one-fifty this afternoon the table of rates was completed and the bill was ready to pass when Senator Raynor took the floor. Mr. Raynor said he had expected that the President would change his opinion before the bill was finally enacted and get back to the Long amendment. "The President," said Raynor, "may have united his party in the senate, but he has divided the people." He claimed that the Allison court review amendment had destroyed the bill and deplored the President's interference.

REFER DISCUSSION TO SCALE COMMITTEE

[BY ASSOCIATED PRESS.] Springfield, Ill., May 18.—The joint meeting of the operators and miners of Illinois voted today to refer all resolutions and matters to the joint scale committee which was appointed.

TO UNITE CHURCHES INTO ONE BODY

[BY ASSOCIATED PRESS.] Dubuque, Ia., May 18.—The Iowa association of the Congregational church in session here adopted a resolution favoring the consolidating of the Congregational, United Brethren and Methodist Protestant churches.

ARE TO GO OUTSIDE STATE FOR FACTS

[BY ASSOCIATED PRESS.] Milwaukee, May 18.—The announcement that the Wisconsin committee would investigate the Union Central Life Insurance company of Ohio came in the form of a statement read into the record by Chairman F. R. Frear at today's session of the Wisconsin life insurance legislative investigative committee.

The corner-stone of the new Trinity English Lutheran church at Racine will be laid on Sunday. The English sermon will be delivered by the Rev. Dallman of Milwaukee.

REVIVAL OF COUNTY FAIR IS AT HAND

J. M. Bostwick, Owner of Grounds, Stands Ready to Expend \$15,000 for Improvements.

That the yearning for good horse races, exhibits of fancy live-stock and fine vehicles, and the other features which go with a county fair still lingers in this community was demonstrated in a measure by the large attendance at the meet which opened at the fair grounds yesterday. While there is no possibility of a fair this fall as a large portion of the grounds has been sublet for crops, J. M. Bostwick, the owner of the property, stands ready to expend from \$10,000 to \$15,000 in getting the track and buildings in shape for revival of that institution here some time within the next two years. "If the people want a fair I will get the grounds ready and ask for no assistance in doing it," he said this morning. A new high board fence will have to be built and some repairs on the grandstand and a few of the buildings will be necessary. In order to inaugurate a fair that will be a credit to the county and city bustling young business men will have to take hold of the project. A large number of them are already enthusiastic and anxious to lend their assistance to such a move.

RETURN INDICTMENTS AGAINST OFFICIALS

Cleveland Ice Men Are in Trouble Regarding the Valentine Trust Law.

[BY ASSOCIATED PRESS.] Cleveland, May 18.—The grand jury returned indictments today against President Harris Norvell and thirteen directors of the City Ice Delivery company, known locally as the ice trust, on the charge of violating the Valentine anti-trust law.

ROYAL ARCANUM IS TO PAY ASSESSMENT

Massachusetts Supreme Court Holds It to Be Valid and Binding.

[BY ASSOCIATED PRESS.] Boston, May 18.—The increase in assessment made by the supreme council of the Royal Arcanum last year is held to be both legal and right by a full bench of the Massachusetts supreme court, which today dismissed the bill to prevent enforcement of the new schedule rates.

FAIRBANKS IN ALABAMA

[BY ASSOCIATED PRESS.] Birmingham, Ala., May 18.—Vice President Charles W. Fairbanks arrived here this morning and attended the general conference of the Methodist Episcopal church, South. Buy it in Janesville.

HORSE SHOW TO BE FASHIONABLE

MANY LADIES ATTEND RACES AT THE FAIR GROUNDS.

GOOD PROGRAM YESTERDAY

Belolter Won Exciting Ten-Mile Auto Race, Though Running on One Rim.

That the interest in horsemanship and horse racing has not been dead but only dormant for the past several years was evidenced by the crowd of fifteen hundred or more people who yesterday afternoon witnessed the first program of the initial Horse Show of Janesville. The spectators began assembling as early as half past one, though the first event was set for an hour after that, and continued to enlarge until nearly the last race, many being able to leave their business or work but for a short time. The people were taken to the racecourse by the street railway, which passes within a block of the Milton avenue entrance, by carriages and by autos. Though only a minority were brought in buzzcarts, those were the vehicles which proved most popular. The trip from the business section to the fair grounds can be made in a very short time by the machines and each car brought delegation after delegation in rapid succession.

To Be Like Chicago Show?
The immense grandstand was of course by no means filled for nearly half of the spectators came in rigs or autos. Carriages and cars lined and doubled and triple lined the track for hundreds of yards each side of the stand. If this audience could be taken as a criterion the horse show promises to become an "event" in the early summer social season. The large number of women present was surprising, and there was a grand display of millinery and new creations by the modistes. It is very likely that the show will become as fashionable as is the mid-winter horse show in Chicago.

Fine Display in First Class.
It was close to three o'clock when the program was opened by the showing of mares and geldings driven by ladies in stanhopes and runabouts. R. C. Kenyon of Chicago, an old time horseman who raised animals here in the good old days when racing was in its flower, acted as judge. He marking the horse forty per cent, appointment forty per cent, and driving twenty per cent (style of going, manners and quality being particularly considered) awarded the blue ribbon and handsome silver loving cup, valued at twenty dollars, to Miss Elizabeth Shicker driving Horatio Nelson's new roan mare, "Flossie," to a stanhope. The red ribbon was placed on the gray driven to a runabout by Mrs. Joseph Murray. Others who contested were Miss Murray of Beloit, driving a chestnut mare from the Morgan farm; Mrs. George Bresse, driving for Mr. C. K. Crissey; Miss Ina Kemmerer, driving for Charles Kemmerer; Mrs. Ed. Dermody and Miss Edna Murdock driving for Sheridan Brothers. This display was an excellent one and the event proved the most interesting of the three in the show.

Alderman Sheridan a Winner.
Three local liverymen entered class two—best turnouts, double or single, owned and driven by a Rock county liveryman. The first prize, a twenty-five dollar silver cup, was given to John J. Sheridan of Sheridan Brothers, who drove a pair of geldings to a high stanhope. The red ribbon was captured by Horatio Nelson with the same horse which won the blue stripe in the first class. The other competitor was Charles Kemmerer.

In the Shetland pony show Victor Gahrath won the cup, valued at fifteen dollars. The second place was taken by John M. Huginf. There was one other candidate for honors, Wallace Ransom. The animals entered were all under forty-eight inches in height and were shown to pony vehicles.

"Charley Howe" Took Race.
Owing to the fact that one driver failed to arrive and despite the fact that several other entries could be secured today if the race be postponed, there were but two horses in the trotting and pacing event. "Charley Howe," owned by Charles Schaller of this city and driven by Gus Drager of Beloit, who is now training the animal for the coming season, won two half mile heats from Charles Carpenter's bay gelding, which was driven by David Watt. The first prize was thirty-five dollars in cash. The victorious horse is entered in various programs throughout this part of the country this summer and will no doubt be among the winners.

Rider Thrown From Pony.
Though both exciting and interesting the Shetland pony race was amusing. Two of the four jockeys rode without saddles and one without holding the reins. The riders were all under fifteen years of age and eight mile heats were run. Stanley Fisher, riding a pony owned by G. U. Fisher, won the first prize of twelve dollars and a half in money. Second honors were divided between Master Myers and Lawrence Griffin. The latter rode an animal, past twenty-three years of age, owned by "Dick" Joles, a well-known horsetrader, who is encamped near the Milwaukee entrance to the grounds. In one of the heats a bit of excitement was furnished by Joles' pony. It ran amuck among a few spectators who had gathered before the grandstand and its rider was thrown off. Neither Griffin nor any of the crowd were hurt and the animal was easily captured.

Women in Auto Race.
The auto race was the sensational number of the program and was captured by James Menhall of Beloit with an eighteen horse-power two cylinder Rambler machine. The course was ten miles and there were four who raced—Arthur Jones with a Rambler runabout with tonneau, Roy Pierson with a Winton touring car, and George S. Parker with a Maxwell. They finished in the order named. Each car, according to regu-

lations, carried three passengers. In Mr. Menhall's machine were Beloit college students—J. M. Tawney, son of Representative Tawney of Minnesota, who has recently made himself known by his strong opposition to the free seed graft; Kirk Smith and A. Mitchell. With Mr. Parker were three ladies—Mrs. Parker, Mrs. F. B. Ramsworth and Mrs. William Reger. Mr. Arthur Jones' companions were Carl Little, Jacob Rosdahl and Frank Joyce and Mr. Pierson's assistants were Henry Skavlen, Louis Skavlen and Charles Tallman.

Machine Minus Tire Won.
At the start, which was made from a stand, Parker held the pole. Menhall was second, Pierson third and Jones had the outside. Pierson, with almost a springing start, secured the pole before the first turn, while Jones caught second, Parker third and Menhall the rear. In the first mile Menhall passed Parker and by the time the second mile was completed he had secured the lead. He gradually "tore" away from the others, while Parker continually lost and in the middle of the fifth mile the former lapped the latter. Meanwhile Jones hung well to Pierson but by the beginning of the sixth was losing. At the same time the left rear tire on Menhall's car flattened. There was too excellent a chance for him to win and he kept to the race. When he had gone a mile the tire was torn from the rim and left it. The speed at which the "liberated" tire was revolving maintained its upright position until it had rolled half way across the inner field. From then on both Pierson and Jones crawled nearer to Menhall but the lead was too much to overcome. However, on the ninth Jones passed Pierson and finished some feet in the lead. In justice to Mr. Pierson, it should be said that he had planned to race a new Maxwell but disposed of the machine yesterday morning. The Winton with which he raced was out of repair.

SEVENTY-THREE OF STEPHENSON HERD

Of Blooded Cattle at Kenosha Farm Condemned by State Veterinarian Roberts.

State Veterinarian E. D. Roberts visited Kenosha yesterday morning to inspect the famous herd of dairy cattle owned by Isaac Stephenson, the Marinette millionaire. During the last few weeks traces of tuberculosis have been discovered in the herd and Mr. Stephenson has ordered that the state department make a test and slaughter every animal found affected with the disease. After a careful test it has been found that seventy-three of the animals are affected and they are to be turned over to the state officer today and shipped to Milwaukee for slaughter. A board of commissioners was appointed to appraise the value of the cows taken, but under the state law the state may not pay more than \$33 a head.

Nearly all of the cattle condemned are pure bred Holstein or Guernsey

cows and they are of great value. The herd has been the pride of Mr. Stephenson for many years and he has spent thousands of dollars in breeding them up to the high state of perfection.

The entire herd consists of 240 head and the remaining cattle are said to be entirely free of the disease. Among the cows to be killed are several thoroughbreds for which Mr. Stephenson had refused to accept hundreds of dollars.

Selling Out.
I am going out of business and offer my stock of boots and shoes at about your own price.
GILBERT EVENSON,
26 North Main St.

"OUR MOTTO" "Purity and Cleanliness in Groceries"

You are invited to call and judge the quality of the palatable things to eat, also the fine tea and coffee to drink.

FREE—The first twenty coffee drinkers that wish to test a fine coffee—San Marlo—will receive 1/4 lb. free. It is high-grade, clean and pure. One pound will make 40 half-pint cups of rich-flavored coffee. Sold at 30c a pound. Try it.

Our German Favorite Coffee at 25c a lb. pleases everybody; it ought to. Why? Buy a pound—you will know.

Tea—We will match our Fancy Jap Tea @ 50c per pound to any sold anywhere. Fine quality and flavor. Get a sample. Compare yours.

Fine Mild American Cheese, also Brick, Swiss, Sap-Sago and Limburger.

Nectar Brand of Canned Goods are the finest. We are city distributors.

CAMPERS or PICNIC and FISHING PARTIES will find it to their interest to see our line of specials for these occasions. Call and we will fit you out.

Mustard, 5c per glass, 10c a jar, and 50c a gallon in bulk.

Fresh Berries, Fruit and Nut Meats.

Extra Fancy Line of Fresh Cookies and Wafers.

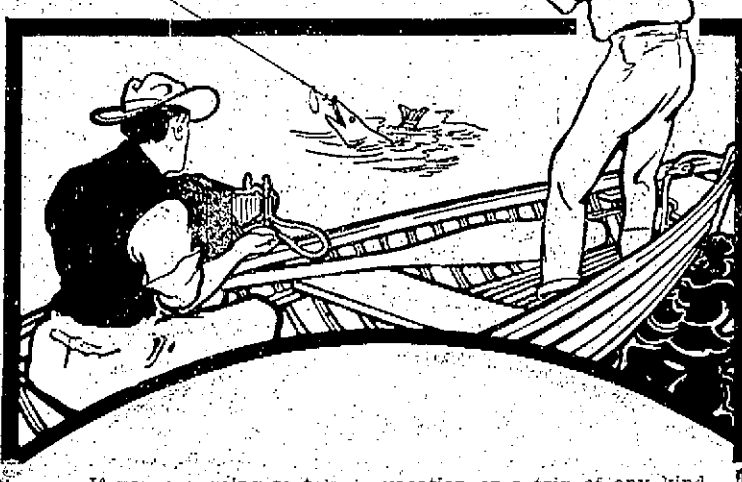

White Lily Creamery Butter—finest made, always on ice.

Yours to please with clean groceries.

CHURCH GROWTH IN YEAR NINETEEN-FIVE

Methodists Only One of Larger Societies That Outstripped the Smaller.

Some figures on the relative strength and growth of the various churches of the United States are given by Dr. Carroll in the Christian Advocate.

In the year 1905 the total number of communicants was 31,148,445, a net gain for that year of 519,155. This membership was distributed as follows: Roman Catholics first, with 10,785,496, net gain 192,122; Methodists second, with 6,429,315, gain 101,892; Baptists come third with 4,374,047, gain 72,607; Lutheran fourth, with 1,841,346, gain 51,580; Presbyterians fifth, with 1,723,871, gain 26,174; Disciples of Christ sixth, with 1,235,294, gain of 1,428; Episcopalians seventh, with 827,127, gain 15,209; Congregationalists eighth, with 637,042, gain 13,321; Reformed (Dutch and German) ninth, with 405,022, gain 4,621.

The percentage of gain is interesting, for the largest denominations are not, except in the case of the Methodists, enjoying the same rate of growth as some of the smaller ones. In their percentage of increase they stand in this order: Lutheran, .028; Episcopalians, .029; Congregationalists, .019; Roman Catholics, .017; Methodists, .015; Presbyterians, .015; Baptists, .014; Reformed, .008; Disciples of Christ, .001.

The large rate of increase of the Lutheran denomination may be partly accounted for by immigration.

Methodists and Baptists are doing most for the negro of the south and are very strong in that section. The Baptist growth in the north, where they number 1,075,833, was but 4,864; but the Methodist Episcopal Church North, 2,910,779 strong, had a growth of 62,847.

Boston is Jealous.
Boston Globe: The Norwegians in Milwaukee are going to celebrate Laila Erickson on May 17. What's the matter with celebrating him somewhere on the seaboard. He didn't land at Milwaukee.

BARGAIN SALE

OF.....

SHOES AND OXFORDS

One Week—Commencing Tomorrow, Saturday, May 19th.

Vudor Porch Shades.....

"How to Cool a Hot Porch"

The easiest way is to use

Vudor Porch Shades

"She can look out, but you can't look in."

"She can look out, but you can't look in."

and add an extra room to your house, cool and shady, at a cost of from \$2 to \$10.

Make your porch a restful retreat this summer, where you can spend your leisure hours and enjoy every breeze, free from the sun's glare and heat.

With Vudor Shades on your porch you can dine outdoors with the same privacy as indoors, entertain visitors, or lounge in easy negligee, free from the inquisitive gaze of passers-by. You can see everyone passing, but no one can look in from the outside.

These shades are made of Linden wood fibre and strong Seine twine, so constructed that every breeze that passes blows through, but the hot sun is excluded.

They are light, extremely durable and anyone can put them up in 10 minutes. Stained in restful, weather-proof colors. Easily raised or lowered at will.

Vudor Porch Shades are inexpensive and afford the only means of obtaining the full comfort and enjoyment of your porch. Anyone can afford them; who can afford to have a porch.

ORIENTAL RUGS

A large shipment of high grade genuine imported *Oriental Rugs* just received. If one has a rug want, now is the time to get just the right thing. *Judees of Oriental Rugs* appreciate the fact that *our prices are much under* the figures asked for like grades by Chicago stores. Why fatten up the big city stores. Is it worth the difference just to say: "It came from Chicago?" "Knowing ones" wink when you say it. These *Oriental Rugs* came direct from the *Orient*, mostly from *Persia*, through a large New York importer.

For Solid Comfort: A Vudor Chair Hammock

Janesville people who have them are loud in their praise. We know of nothing made that is their equal in comfort-giving qualities. They conform to every change of position and allow one absolute rest; every muscle can be relaxed. We have a *chair hammock* in position in our carpet department. Come in and try it. Their simplicity recommends them. The price will make them **\$2.50** popular.

We Hang Them Free.

An Essential To PORCH COMFORT.
TRADE Vudor MARK

IN THE HOMES

When a newspaper goes into the homes, it has advertising value. The Gazette goes into nearly every occupied home in Janesville, and offers you the opportunity to bring your want before the very people who would most likely be interested. If you've got a house to rent or an article to sell, this statement is of particular value to you. Many others have tested it and found it to be true. Have you?

Read the want ads.

...FORTY YEARS AGO...

Janesville Daily Gazette, Friday, May 18, 1896.—A Search for the Murderer.—Information having been brought to Sheriff Winchester that Schilling had been seen by a boy in the vicinity of where the crime was committed, that officer took action yesterday to find him. He went into the neighborhood and organized a force of some thirty men and spread them out through the woods, in sight of each other, scoured the timber land thoroughly for a distance of five miles but got no trace of the murderer.

Getting Ready.—At a meeting of the Baptist Society last night to consider matters in connection with their new church building, Messrs. Payne, Palmer and Wilcox were appointed a building committee. They have not yet raised sufficient funds, but they propose to be in readiness to act when the time comes.

The Exhibition of Stallions.—The display of horses yesterday was large and comprised some beautiful stock. The attendance was very creditable in point of numbers, but was by no means as large as it would have been had farming operations been further advanced. An admirable opportunity was offered those interested in the improvement of horses to examine and compare the breeding stock in the county, which will undoubtedly have its effect in the future.

BOTH NORCROSS AND LENROOT ARE GOING

Are to Be Present at Green County Old Soldiers' Reunion on July Sixth.

[BY ASSOCIATED PRESS.]
Brother, May 17.—Hon. Irving Lenroot, of Superior, has accepted an invitation from the association to be present at the Green County Soldiers' Reunion to be held here on Friday, July 6. Hon. P. Norcross of Janesville, commander of the Grand Army of Wisconsin, will also be present.

Epworth League Social.
The M. E. Epworth League held a social on Monday evening at the home of Miss Florence Cole. There was a good attendance and a very enjoyable time is reported.

Holcomb Stair Nuptials.
On Wednesday morning, at eight o'clock, at the home of the bride's parents, Mr. and Mrs. R. J. Holcomb, occurred the marriage of Miss Lura Holcomb and Mr. Sidney Stair, both of this city.

Brotherhood Brevities.
Mr. and Mrs. B. E. McCormick spent Sunday in Waterloo.

L. A. Hodges of Monroe transacted business in our city last Thursday.

Dr. Geo. Mott left last Thursday for Davenport, Iowa, to transact business.

Miss Clara Holcomb who has been spending the past year in Colorado for the benefit of her health, returned to her home in this city last Friday. We are glad to report she is much improved in health.

Mrs. Mayo Hartman of Marshfield is visiting her parents, Mr. and Mrs. S. Laube of this city.

S. Stephenson of Albany spent Tuesday with Mr. and Mrs. C. J. Stephenson of our city.

Mrs. J. Swan returned on Monday evening from Milwaukee where she has been spending the past few weeks with her daughter.

Mrs. Geo. Stewart of Marshfield, is visiting her parents, Mr. and Mrs. B. J. Rolfe.

Mr. F. C. Cooley who is spending a few weeks working in Janesville, spent Sunday at his home here.

Labor Notes

The membership of the International Typographical Union is 47,314, including the allied crafts. Out of this total membership, 33,226 are at the present time working, but eight hours a day.

Over half the flour mills of Minneapolis have shut down, throwing the employees out of work.

Notices have been sent out by the Amalgamated Association of Iron, Steel and Tin Workers to all sub-branches, notifying them that the annual convention will open at Cincinnati on May 1, and requesting them to send resolutions regarding any changes in the wage scale or working rules to the national headquarters before March 31. It is stated on good authority that the Association will demand an increase in wages this year and several changes in the working rules.

Locomotive engineers on the Grand Trunk Railway are unwilling to accept an increase of 4 per cent in their wages offered by the company in response to their demand for abolition of the present sliding scale, and in lieu thereof a uniform rate of wages equal to that of Canadian Pacific men. Owing to the disagreement, both sides have consented to settlement by arbitration. All danger of a strike is thus averted.

Day laborers in Venezuela are paid from 50 to 80 cents per day; domestic servants \$2 to \$10 per month with board; cooks \$5 to \$10 per month with board; farm laborers \$40 to \$60 per month with board; hotel waiters \$8 to \$12 per month with board; dry goods clerks, \$20 to \$60 per month.

NOTICE TO LAY SIDEWALK

NOTICE TO LAY SIDEWALK

To the owner of lot one hundred and ten (110) in Milwaukee's addition to the city of Janesville, Rock County, Wisconsin:

You are hereby notified to build a standard sidewalk in front of your said lot, and upon Western avenue, northward, and that if you fail to complete the same within twenty days after the service upon you of this notice, the work will be done by the city, and the expense thereof charged to and levied upon such lot as a special tax.

Dated May 18, 1906.
By order of the Common Council of the city of Janesville, Rock County, Wisconsin.

JAMES SENNETT,
Street Commissioner.
Per THOS. McKUNE,
Assistant Street Commissioner.

"Prosperity be thy page!" is one of Shakespeare's benedictions. "Page" adds usually prosperity in a store.

Tom Lawson appears to have been lost in the shuffle but his admirers say that "his soul is marching on."

The rate bill is still hanging fire as it should until justice is done to all concerned. It sometimes pays to make haste slowly.

The junior senator from Wisconsin is getting a good deal of free advertising, but it is not of the complimentary sort. The magazine writers appear to be letting him alone. "Every road has a turn."

The latest sensation in reform circles is the exposure which has come to light in the life insurance investigation. The \$2,000,000 said to be demanded of the Equitable for campaign purposes is on a par with the school book scandal.

Mr. Bryan writes from Egypt that he has no desire to be a candidate for president in 1908 unless circumstances seem to demand it. Bryan has quite a stock of circumstances in control and the demand to use them will come to the surface early in the campaign.

Lieutenant Governor Sherman of Illinois, in speaking of the primary law recently enacted in that state, says: "It portrays great and painful motion without one inch of progress. It seems to me that it was conceived in a refrigerator and born in a frost. When in good working order no one will be proud of the offspring."

COOPER A DISAPPOINTMENT.

The opposition prevails that long service in congress entitles a man to special privileges and unusual influence. Congressman Cooper, from the first district, is now serving his seventh term and yet aside from the fact that he is recognized as a genial gentleman and good entertainer, he has but little to show in the way of distinction for his long term of service.

One reason for this lack of recognition is found in the fact that Cooper has not always been in harmony with the principles of his party. It will be remembered during the Bryan campaign that he spoke at the opera house and the sentiment expressed was so badly unctured with the free silver doctrine that many republicans were disappointed and criticism was freely offered.

On recent state issues he was out of harmony with conservative party principles, and antagonistic to the element in his party which placed him in office.

On the tariff issue he was the only man in the Wisconsin delegation to support the Philippine measure on sugar and tobacco, and this in spite of the fact that his constituency was protesting loudly against his action.

The people of Racine are disappointed in him, just now, because he failed to secure for his home city a naval station. The Racine Journal expresses the sentiment of his home constituency in the following editorial:

"There is no disguising the fact that the people of Racine have been woefully disappointed in Congressman Cooper's failure to land the naval station for this city. By every consideration, Racine was entitled to the naval school. We had the location, the price asked for the land was cheap; every point was in favor of Racine. All we needed was the right kind of manipulation in congress to get it, and that is where Racine fell down.

"For a good many years the people have been somehow or other led to believe that the longer a man is kept in congress the greater his prestige. Fourteen years ought to be long enough to acquire prestige sufficient to get the influential men in congress to listen to a man, especially when he has things virtually his own way as did Mr. Cooper in this naval station matter. The Racine congressman did get in a few words of protest after the matter was all cooked and dried, but fourteen years ought to have entitled Cooper to have had a look-in, while the cooking was in process.

"No matter the tale that may be told us, the fact remains that Racine was badly thrown. But then fourteen

years is after all but a brief period of time, only we have all been misled about the matter of prestige."

It is time that the first district elected a new congressman and the people are fortunate in having a candidate who will represent their best interests, and whose ability will gain recognition. M. G. Jeffris is the man and his campaign is already well in hand.

DEMOCRATS CLAIM HIM.

The democratic party is in the market for a leader. Bryan and Hearst are unsatisfactory to the conservative element, yet the fact is recognized that radicalism is demanded by a majority of the party. The gyrations of the new Wisconsin senator are being watched by democratic leaders with more than usual interest, and the party is now ready to receive him with open arms.

The Milwaukee Journal, the leading democratic paper in the state, contains the following editorial under the significant heading, "La Follette For the Presidency." The Journal voices the sentiment of a liberal element in the democratic party. It remains to be seen what attitude will be assumed by the new senator. The Journal says:

"They say that Senator La Follette is a democrat. He has, once more, been read out of the republican party. He is not in good repute with Aldrich and Elkins, and Foraker and Hale and other more or less important republican leaders. 'Away with him,' he is a democrat," they say.

"Suppose they are right. The democrats of the nation are looking for a leader; they are in need of a Moses. Why not, La Follette?"

"What is the matter with La Follette as the democracy's candidate for the presidency in 1908?"

"Where does Bryan or Parker or Hearst or Bailey or Folk have it over La Follette? He has had more experience as a party leader than any of these men. He knows his own mind; he is a fighter; he never gives up; he will stick until the cows come home.

"The tariff is to be the big issue in the next presidential campaign. La Follette is a low tariff man. The democrats are for a low tariff. In what respect does La Follette not fill the requirements with regard to the tariff?"

"La Follette stands for genuine control over railway corporations, a policy which is said to be democracy of the Simonpure brand. He is a trust-buster of a pronounced type and trust-busting is democratic, and, withal, popular. He is a champion of the masses and of the old-fashioned principle of representative government. That is good democracy."

"La Follette stands for the progressive program suggested but not carried out by the president—a program, by the way, which is said to be democratic. The president has repeatedly been accused of stealing democratic thunder. But the president doesn't stick. He backs water too often. That cannot be said of La Follette. He doesn't waver. He is not afraid. He hews to the line, as he has again just demonstrated in his fight upon the rate bill in the senate.

"The democrats want a man who is aggressive. La Follette is that. They want a leader who will put the other fellows on the defensive. La Follette will do that. They want a man with backbone. La Follette has lots of it, more perhaps than any other man in public life. They want a man whose record is clean. La Follette's record is clean. They want a man with a personality—they have had enough of the Parkers. La Follette has a personality. They want a man of experience. La Follette is such a man.

"Where, in fact, does La Follette fall short? He measures up to the democratic requirements and he is not averse to being president. What is the matter with the junior senator from Wisconsin as the democratic nominee?"

PRESS COMMENT.

Fun in the Senate.
Chicago News: Though sitting down on La Follette is a good deal like sitting down on a hot stove, the senate rather enjoys the sensation.

Counsel's More Tactful Course.
Chicago Tribune: It is hard to teach an old senate new tricks. Perhaps the best course for Mr. La Follette to adopt would be to trim down his pompadour and wait.

Mere Fraction of Big Total.
Exchange: Only 500 saloons have gone out of business in Chicago on account of the high license. The chances are that they will never be missed.

Relieved From Responsibility.
Chicago News: "This," said Tillman in opening yesterday's speech, "is Tillman talking now," thus exculpating everybody else from blame in advance.

Still Plenty Of Room.
Exchange: While the nations of the world are all trying to see which will be able to build the largest ships, the man who owns the ocean has not yet seen the need of having it enlarged.

Even Town Clock Stopped.
Milwaukee Sentinel: Even the town clock was included in the order that "closed" Kokomo, Ind., last Sunday, a wag having climbed the tower of the court house and stopped it at midnight.

Put a KODAK in your Pocket on your vacation.
Pocket Kodaks from \$6 to \$20.
SMITH'S PHARMACY

A STORE TO DEPEND ON FOR STYLE

Ready to Wear
Garments

MRS. JAS. FLAHERTY

55-W. Bluff St.,
Is another convert to the PAINLESS
DENTAL idea.

She said to a friend whom she met
yesterday, and with whom she had a
little conversation regarding dentis-
try and dentists:

"I can hardly believe it true that
my teeth are out WITHOUT MY BE-
ING HURT."

"I am so glad I went to DR. RICH-
ARDS."

"Some of my friends and neigh-
bors had been at me for a long time
to go to him, but I dreaded it so
much."

"I shall surely recommend him to
all my friends, for he hurt me the
least of any dentist I ever had work
for me."

If you HATE PAIN and wish GOOD
THOROUGH WORK consult Dr.
Richards yourself.

in store for lovers of oriental rugs.
Their large window is a veritable art
gallery. More about them in their
announcement today.

**NO FEATHER BEDS
FOR JAIL BIRDS**

CONSIDERATION OF MATTER DE-
FERRED BY COUNTY BOARD.

ROAD APPROPRIATIONS ALSO

Were Left Unattended to Pending a
Careful Investigation of
the Law.

Prior to adjournment yesterday af-
ternoon the county board of super-
visors deferred consideration of the or-
der to remove the hammocks at the
county jail to the November meeting.
Inmates of that institution will, there-
fore, have to worry along without
feather-beds until the frost is on the
pumpkin and the fall crop of bird
plumage is reaped. An appropriation
of not to exceed \$345 was voted for
painting the buildings at the county
farm. The sum of \$300 for incident-
al outlays that may be necessary
during the year was voted the build-
ing committee. Having satisfied them-
selves that County School Superin-
tendents Hemingway and Antisdel
were entitled to the extra \$100 yearly
compensation under the new law,
the county fathers voted each of them
the sum of \$33.33, the back salary
now due. Appropriations of \$200
each for printing, attestation, etc.,
were made.

W. G. Palmer Resigns
Owing to his impending removal
from the city, W. G. Palmer has re-
signed his position as a member of
the Soldiers' Relief Committee and
his bill for \$23.98 against the county
was allowed. County Judge J. W.
Safe will appoint his successor. A
resolution introduced by Supervisor
Livermore, calling for the appoint-
ment of a committee of three includ-
ing Chairman Jones to visit and in-
spect each and all the properties of
the county and report their findings
in detail at the November meeting,
was passed. The two members be-
lieve the chairman are E. C. Hopkins
and F. F. Livermore. Supervisor
Bear introduced a resolution calling
for the appointment of a committee
of three to make an examination of
the old records in the register of
deeds' office and report at the next
meeting of the board. The resolution
carried and J. L. Bear, W. H.
Howard and Charles More were ap-
pointed. It being found necessary to
advertise again for bids for the coun-
ty printing, Supervisor Livermore
offered a resolution to that effect and
the same was passed.

Petitions Referred.
The petitions of the town super-
visors of Bradford and Beloit for \$800
and \$600 appropriations for the im-
provement of roads, were referred to
the committee on roads and bridges
and the district attorney. It is be-
lieved that the law which at first
blush seems to place unlimited power
in the hands of the town supervisors
in the way of forcing the county to
help build good roads, in reality im-
poses a restriction on the amount
that can be appropriated for this pur-
pose in any one year. An off-hand
opinion has been given that the
amount is restricted to \$1,000. If this
be true the question arises as to
whether or not the county officers
have any discretion in the matter or
whether they must act on the peti-
tions in the order in which they are
received.

OBITUARY

Chester R. Miller.
The funeral of the late Chester R.
Miller, who died suddenly at his
home on Ringold street, at four o'clock
Wednesday afternoon, will be held
from the residence Saturday morning
at nine o'clock. Rev. McKinney of
Christ Episcopal church officiating.
Deceased was about sixty years of
age and is survived by a wife and
four children. Prior to making his
home in Janesville, Mr. Miller resided
in Minneapolis. For many years he
followed the trade of a cooper. The
interment is to be at Edgerton.

Mrs. Olive Baum.
The funeral of the late Mrs. Olive
Baum was held this morning. Rev.
J. H. Tippet conducting services at
nine o'clock from the home of her
son, E. A. Baum, 6 Delavan Road.
The remains were taken overland to
Edgerton for burial and the pallbear-
ers were A. F. Lee, S. B. Phelps, C.
Hanson, and J. McBeth.

**SIXTY COUPLES ATTENDED
THE LABEL LEAGUE DANCE**

Refreshment Stand Was Very Popular
On The Warm Even-
ing.

Sixty couples attended the dance
given under the auspices of the
Women's Union Label League last
evening. An ice cream and lemonade
stand, erected in one corner of the
room, was well patronized. The ar-
rangements were in charge of Mrs. D.
Ogden. Mrs. Patrick McKeligue, Miss
Sina Forest, Patrick McKeligue, and
Edwin Falter. The floor committee
consisted of Edwin Falter, Patrick
McKeligue, and D. Ogden.

**HIGHWAY COMMITTEE WOULD
GRANT RAISE TO TEAMSTERS**

And Intends to So Report at the Next
Meeting of the Common
Council.

After a conference with the repre-
sentatives of the Teamsters' Union
last evening, the members of the high-
way committee of the common coun-
cil expressed themselves as favorable
to the \$4-a-day rate and stated that
they would so report at the next meet-
ing of the city fathers. They did not,
however, reach complete agree-
ment as to the time when this should go
into effect. The Teamsters' Associa-
tion asks that it be "in force" from
May 1. A regular schedule, outlining
the number of loads to be hauled each
day, will be outlined for their guid-
ance.

Announcement
I hereby announce my candidacy for
the republican nomination to the of-
fice of sheriff of Rock county at the
primary to be held on September 4,
1906.
ALVAH MAXFIELD.
Dated May 18, 1906.

**EAGLES WILL OPEN
SEASON IN A GAME
WITH BELOIT TEAM**

New Diamond at Fair Grounds Will
Be Given Initiation Sunday—
Red Sox Play at Yost's Park.

Sunday afternoon at three o'clock
the baseball team of the Janesville
Acile, Fraternal Order of Eagles, will
open their season in a game with the
Beloit Eagles. The contest is to
take place at the Fair Grounds and
the new diamond will be given its in-
itiation. It has been rolled as level
as a floor and is without a speck of
grass, making one of the finest ball
fields in the vicinity.

Red Sox Game
The Red Sox team is scheduled to
play Sunday afternoon at Yost's park
with the Shamrocks of the Line City.

**TWO MORE TRAINS
FOR JANESVILLE**

Local Residents Will Soon Be Able
to Leave for Madison at About
Eight in Morning.

Janesville is soon to have two new
trains. One, over the North-Western
line, is definitely decided upon, and
the other, which is still in prospect,
but practically assured, is over the
St. Paul. The North-Western train
will run only on Sundays between
this city and Koshkonong station
and the time of leaving and arriving
will be announced by the new time
card, which is expected within a day
or so. Changes in times of other
trains will be made when this card
goes into effect. The new St. Paul
train is one which local residents
have been desiring for a long time
and even petitioned for once. It is a
daily early-morning run to Madison.
Through arrangements for this train
have not been completed it is very
likely that it will depart from here
at about 7:45 or 8 o'clock in the morn-
ing. It will connect for points on the
Prairie du Chien division with another
new train which is to be added
shortly to the Milwaukee-Madison
schedule.

**A CLASS OF FIFTY
WILL BE INITIATED**

Knights of Columbus to Have Import-
ant Celebration Here—Two Hun-
dred Visitors Expected.

Carroll Council Number 596,
Knights of Columbus, are planning to
hold a big initiatory celebration here
on the afternoon of Sunday, June 3.
Forty-five or fifty candidates, twenty-
five of whom are for the local lodge
and the rest for neighboring socie-
ties, will be taken into the order
and fully two hundred visitors are
expected. Delegations will come from
Rockford, Beloit, Madison and other
places and it is likely that a special
train will bring a deputation of
knights from the councils along the
Mineral Point branch of the St. Paul
road. The event is to take place in
Assembly hall and after the ceremon-
ies refreshments will be served. Dis-
trict Deputy Supreme Knight J. J.
Cunningham has extended an invita-
tion to State Deputy John F. Martin
of Green Bay to take charge of the
work and an acceptance from him is
expected.

LOCAL PARAGRAPHS

Orford Mining Co. Articles of or-
ganization of the Orford Mining Co.
of the village of Orfordville have
been filed with the register of deeds.
The capital stock is \$50,000 and Oluf
A. Peterson, Benik Roen, and Harold
B. Anderson are the incorporators.

Geo. Decker Chauffeur: George
Decker yesterday made the purchase
of a large Maxwell touring car.
Stork Paid a Visit: A baby boy
arrived at the home of Mr. and Mrs.
Henry Decker northeast of the city
yesterday. Mother and child are do-
ing nicely.

Ralph Adair Here: Ralph Adair, po-
lice judge of Iowa, Kansas, and repub-
lican candidate for county attorney
is in Janesville, fortifying himself
with a rest before the strenuous fall
campaign. The republican ticket in
his locality has won in the past and
the outlook for his election is very
encouraging. A Graham of the news
department of the Iowa Telegram is
visiting with him here.

Live Coals Started Blaze: Fire
from some live coals, deposited in the
door yard, was communicated to the
carriage shed in the rear of Harry G.
Carter's residence on Pleasant street
yesterday afternoon. The department
responded to a call at 2:30 and
quenched the flames before any large
damage was done.

**PREPARING TO RETIRE
AT AGE OF EIGHTY-TWO**

Gilbert Evenson Is Closing Out His
Boot and Shoe Establishment on
North Main Street.

Gilbert Evenson, who has been in
the boot and shoe business in Janes-
ville since 1869 and was identified
with the firm of Myr & Evenson of
East Milwaukee street not so many
years ago, is closing out his establish-
ment on North Main street, near the
fire station. Mr. Evenson is 81 years
of age and for nearly 70 years he has
been following the vocation which he
learned as a boy in the old country.

THE WEATHER

Temperature last 24 hours taken
from registered thermometer at Helm-
street's drugstore: highest, 57; low-
est, 61; at 7 a. m., 64; at 3 p. m., 77;
wind, west, pleasant.

**ANOTHER LARGE
CROWD AT RACES**

AND HORSE SHOW AT FAIR
GROUNDS TODAY.

KELLY OF BELOIT IS FIRST

In Contest for Best Roadster in Har-
ness—Horatio Nelson's Roan

Mare Close Second.
Fully 1,500 spectators were on
hand for the second day's horse show
and racing events at the fair grounds
this afternoon. It was after three
o'clock when the program was open-
ed. Dr. Cleophas of Beloit was judge.
Mr. Kelly of Beloit, with a brown sta-
tion, carried off the blue ribbon for
the best roadster. Horatio Nelson
was second with his roan mare. The
contest was very close. Two other
entries were made by George Casey
and Tom Siegel. The running race
and the event for pacing roadsters
were expected to furnish plenty of ex-
citement.

LATE LOCAL NEWS IN BRIEF

Men's balbriggan underwear, dou-
ble seat, 25c. Archie Reid & Co.
Ladies' gauze vests, high neck, long
sleeves, 15c. Archie Reid & Co.
45c worth of Albany towels for 25c
at Archie Reid's.

A nice new lot of shoes from the
factory, \$1.49 to \$2.69. Get a pair
now. See our ad on page 2. King,
Cowles & Field.

Amateurs at West Side tonight.
Have you visited the Park Phar-
macy yet? If not, you have missed it,
as it is going to be the headquarters
this season for those who relish a
really good glass of soda. Their soda
department is in the south store,
where there are numbers of tables
and cozy corners, and to see them
once will make you a regular custom-
er. A great advantage is that there
is so much room there is no crowding
and you can sit and visit as long as
you wish, and it is not only the de-
licate flavors but the way Heimstreet's
clerks serve them. Delicate Haviland
china, fine glass, all help to make the
Park Pharmacy the soda center of the
city.

Amateurs at West Side tonight.
Bargain sale of shoes and oxfords.
This is the chance of the season. You
cannot afford to miss it. See our ad
on page 2. King, Cowles & Field.

Ladies' white canvas shoes, \$1.50
quality at \$1. Saturday. Rehberg's.
Thirty-fifth annual convention of
the Rock County Sunday School as-
sociation will be held at Shopper's,
Saturday and Sunday, June 10 and 17.
Spring suits, \$15 to \$18, at \$12—a
savings of \$3 on a suit. Rehberg's.
150 children's staple cotton dress-
es, white and colored, from 75c to
\$3.50. See them at Archie Reid's.

Amateurs at West Side tonight.
Fifty dozen men's negligee shirts,
45c, 60c and \$1. Rehberg's.

The ladies of the Central M. E.
church will hold their cake and home-
baking sale at Heimstreet's drugstore
tomorrow morning, beginning at ten
o'clock.

Tomorrow only \$2.50 ladies' ox-
fords at \$1.38. Rehberg's.
Read all about the fair store's big
muslin underwear sale on page 12.

For Sale—An Auto: The owner
having purchased a larger auto, the
Rambler touring car, which won the
auto race Thursday afternoon, is for
sale at a bargain. It is a two-cylinder,
15-horsepower machine with front
glass and full equipment. For price
apply to James Menhall at "Jimmie's
College Inn," Beloit.

Great bargain shoes and oxford sale
commencing tomorrow, Saturday. Not-
ice our ad on page 2. King, Cowles
& Field.

Mr. Editor: How is this for the 25
glasses of Heimstreet's soda water?
In the spring the young man's fancy
lightly turns to thoughts of how
he can keep his girl in soda.
Heimstreet's soda cools his brow.

—Kittie E.
We wish to thank our friends and
neighbors and express our gratitude
for their sympathy and the beautiful
floral offerings at the death of our
husband and father.

MRS. M. MATHIAS and family.

NEWS OF A PERSONAL NATURE

F. C. Haselton was in the city yester-
day greeting old friends.

Dr. C. B. Wilcox of Colorado Springs
will deliver his popular lecture on
"What Constitutes a Man" at the
Methodist church next Monday even-
ing. If you miss this lecture you will
miss a rare treat. Admission, 35c.

Dean E. M. McGlinchy is in Mil-
waukee.

Miss Lillian Butler returned to her
home in Whitewater last evening af-
ter visiting Mr. and Mrs. Royal Mead
for several days.

The Misses Elsie Fathers and Leah
Rowe went to Edgerton this morning.
George Kundert of Monroe has re-
turned home after a visit in the city.

William Winkley is ill at his home
on Milton avenue.

Bert Schlatter of Beloit is attending
the horse show here.

Mrs. H. V. Horton and daughter,
Miss Ladvie Horton, accompanied by
Mrs. H. V. Wistner of Ogden, Utah,
attended the horse show and races
yesterday. Mrs. Wistner is the wife
of the chief train dispatcher of the
Southern Pacific railroad.

Jerome Waterman and family have
moved from the town of Rock into
the city.

The Misses Edna Hemingway and
Margaret Croake of Hanover visited
here Wednesday.

Mr. Levy of Beloit attended the
horse show yesterday afternoon.

George H. Mott of Brodhead is in
the city today.

W. S. Heddles of Edgerton was in
the city last evening.

John Walters of Beloit is a Janes-
ville visitor today.

Mr. and Mrs. J. C. Hogan of La
Crosse are in the city today.

Friends of E. J. Starr of the town
of Newark, who was reported so crit-
ically ill yesterday, will be glad to
learn that his condition is much im-
proved today. He is a brother of Su-
perintendent of Assessments, Frank P.
Starr.

..LINK AND PIN..

News for the Railroad Men.

North-Western Road.
On account of the quietness that is now reigning in business circles, one switch engine, number 737, which has been working from one o'clock in the afternoon until midnight, has been taken off.

D. J. Barry is acting as flagman at the Five Points, and expects soon to be strong enough to resume his work as switchman.

August Busch, of the roundhouse force, is laying off and Martin McDermott is serving as assistant boiler-maker in his place.

The employees of the freight office have received notice that until orders to the contrary are given they will be allowed two days' vacation in each month besides a regular two weeks' off during the summer.

Frank Fraunfelder, day bill clerk, is in Chicago today and his duties are

being performed by Yard Clerk Angles.

Frank Griffin is on the sick list and John Barry is tending the switches at the Five Points.

Locomotive number 59, which has been overhauled and extensively repaired, was given a trial in the yards this morning and is to be returned to service shortly.

St. Paul Road.
Conductor George Richardson, who has been on the sick list the past week, is on the road to recovery.

The advertising bear of the "Fire-Fighters," who are to appear here later in the season under the auspices of the local fire department employees, passed through today enroute from Beloit to Madison.

Herman Summerfeldt, a fireman on the Mineral Point and Northern, died recently after an illness of but a few days with black diphtheria.

John Valentine, night operator at the passenger depot, was in Edgerton today and witnessed the performance

of "Gollmar Bros." circus.

Bernard Dunwiddie has gone to Mineral Point to take up his position as conductor on the M. P. & N. railway.

Mate Martin Meyer has decided to remain on the Plattville branch.

LA FOLLETTE AND THE SENATE.

It is no great surprise to any one to see Senator La Follette jump over party lines as though there were six-inch curbing, as he never was a party man except in spots anyway.—Chicago Daily News.

Another memorable feature of the late debate in the senate, has been the repeated and hearty snubbing of the Hon. Bob La Follette. And it has been almost unanimous.—Boston Herald.

Senator La Follette's motion was voted down. Stereotype this.—Boston Herald.

PRESS COMMENT.

Or They Can't Fill Old Ones.
Evening Wisconsin. The big lumber manufacturers of the northwest who propose giving new names to the various grades of lumber probably realize that the price of their product has gone high enough to entitle it to a royal nomenclature.

If We Only Could.
Madison Journal: Let's all get in on some trust. There's money in it. Yesterday the Standard Oil declared a quarterly dividend of \$9 a share (36 per cent a year) and today gasoline was advanced another cent a gallon. The last quarterly dividend was \$15.

Anxiety On Other Side.
Exchange: How funny it sounds to read in a country paper that negotiations are progressing favorably for the appearance of some artist or other at that town. It's like the young man who has "decided to accept a position" which he was breaking his neck to get and losing which might have resulted in heart failure.

Anybody But Lenroot.
La Crosse Leader-Press: The Merrill Advocate, a staunch Stalwart paper, is supporting Davidson for governor. It is evident that Davidson will receive a great deal of Stalwart support, not that the Stalwarts love him, but that they consider him a choice of evils. It is anybody but Lenroot with a great many conservative Republicans.

No Harmony Among Physicians.
Exchange: One of the doctors with an air of authority assures us that white bread is more healthful than the sacred brown bread which some of the superior ones fall down and worship. If you will notice, a man can eat anything he wants and at the same time get authority from the doctors for doing it. If our food disagreed with us, no matter what we ate, as seriously as the doctors disagree among themselves, this would be a much happier world.

Impatience Everywhere.
Madison Democrat: This is the season of the year when patience is much needed. The housewife is impatient with the trials of spring cleaning. The sportsman is impatient for the arrival of the open season for fishing. The children are impatient for the coming of the summer vacation. Politicians are impatient for congress to adjourn and the off-year campaign to begin its country-saving refrain. But the sweet girl graduate will soon be abroad in the land and everything will be lovely once more.

One Survey Of Situation.
Dredhead Register: The preliminary movement to make Hon. Malcolm G. Jeffris of Janesville the successor of Congressman Cooper is inaugurated, and it is said that Rock county will support his candidacy enthusiastically. He is also counting on the solid support of Walworth county, and a large following in Kenosha, with support in LaFayette, Green,

SORES AND ULCERS

TRoublesome-Offensive-Dangerous

Nothing is more discouraging than to have an unhealthy sore or ulcer resist one treatment after another, sometimes scabbing over and apparently getting well, then returning with renewed energy and becoming worse than before. Sores and ulcers are not due to outside causes; if they were, salves, plasters, lotions, etc., would cure them. They are kept up by a diseased and polluted condition of the blood brought on by the absorption of refuse and waste matters of the body into this vital fluid. These accumulations find their way into the blood, usually because of an inactive and sluggish condition of the system. Nature intends that they shall be carried off through the usual channels of waste, but the different members failing to perform their duties properly leave the matter to sour and ferment. The blood then, in its effort to keep the system healthy, absorbs these poisons and at the first bruise, cut or wound the sore is formed, and the constant drainage of foul matter through it keeps the place open and irritated so it cannot heal. Another cause for old sores and ulcers is the polluting or weakening of the blood from the remains of some constitutional trouble or the effects of a long spell of sickness. S. S. S. begins at the fountain-head and drives out all poisonous matter and germs, and makes a lasting cure. As soon as the system gets under the influence of S. S. S. the inflammation gradually leaves, the flesh takes on a healthy color, and soon the place is permanently healed. Book on sores and ulcers, and any medical advice without charge.

and also quasi-support in Racine. But Racine county will have a candidate, although it is believed that any other candidate in Racine county than Mr. Cooper would be turned down. In fact, Cooper, who is a Racine county man, has yet a loyal support in every county in his district, and should be a candidate for the eighth term, he will make the primaries an interesting battle all along the line. So far we have not been advised from any reliable source of Mr. Cooper's future plans in this regard. One thing is certain, if a change of men is made the nomination will not go to Racine county.

The Lincoln Club Dinner.
Evening Wisconsin: What the speakers said at the dinner of the Lincoln Club Republicans last evening aroused enthusiasm among those present. The keynote of all the addresses was the movement for pure politics and control of corporations by the state.

The orators of the occasion were W. D. Connor, chairman of the Republican State Central Committee; Irvine L. Lenroot, speaker of the Assembly, and State Senator J. J. McGilivray. President E. J. Gross, who acted as toastmaster, also made a stirring address. Now that conventions have been done away with, political dinners are likely often to be resorted to in advance of primary elections, not only to contrive publicity for candidates, but to launch political issues. The Lincoln Club dinner may be recalled in years to come as a pioneer event of its kind.

It developed no political surprises. The issues which were broached were not novelties, but have been discussed for some time. The Republicans of Wisconsin know pretty well what they want. If any difference develops among them this year it will be a difference as to methods and men.

MISS GLADYS M. PARSONS' ENGAGEMENT ANNOUNCEMENT

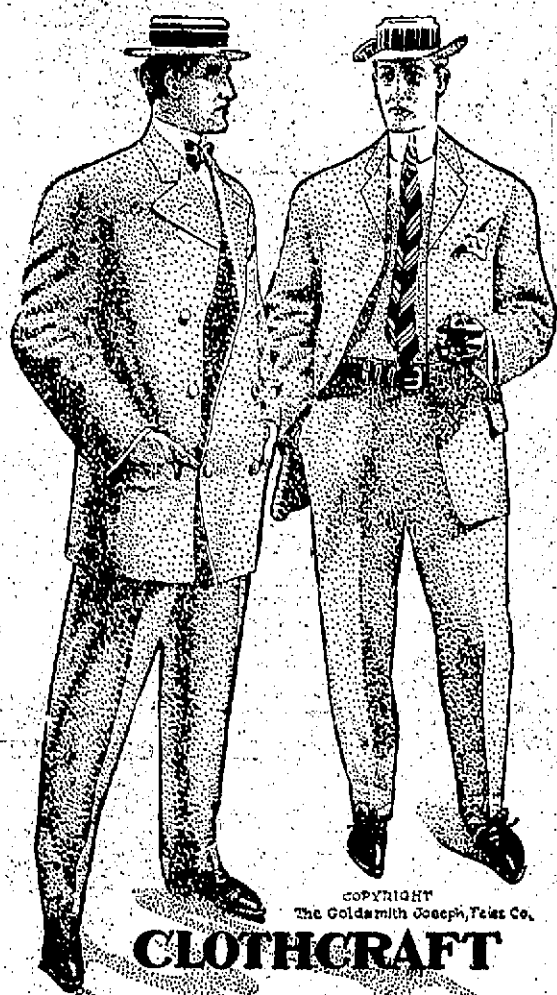

Has Been Made, in Sandusky, Ohio, Present Home of Mother, Mrs. Frederick Parsons.

A Study of EDISON

MAKING A NEW RECORD IN THE PHONOGRAPH DEPARTMENT

This is to be as logical a study, briefly related, of Edison the man, as space will allow. I desire to trace the combination of strategy, inspiration and human shrewdness that have been neglected in any general survey of the inventor who has placed America in the foremost rank of the scientific world, among such men as Roentgen, Koch, Haeckel, Loebl and others—searching and achieving brains of the world. Known to the entire world as a great inventor, there has been a tendency among the few writers who have met him personally to flavor their description of him with a literary touch that is as fictitious as the stage picture of Shakespeare's apotheosis. Through all the information which has been given to the public of Edison's personality I seem to have traced this literary inaccuracy—an emphasis of the stooping shoulders, the negligent attire, the abstracted manner, the untrimmed hair, the sudden flash of genius in the eye, the inroad of mysterious acids on his clothes. He has been pushed to the center of the world's stage as a dramatic character, the wizard of that most incomprehensible chamber of magic to the scientific eye, a laboratory.

I confess that I approached Edison with something akin to the feeling a child has for a conjuror.

Would he be so arrogant at an interruption of his communings with a fluid secret in a tiny bottle before him, and accidentally hurl explosive chemicals at us, or would he be in some pleasant, experimental mood that would induce him to exhibit a few harmless laboratory tricks for our amusement?

Or would he wave us aside and send us away with only a deeper reverence for the mysterious secrets of his soul. I am not ashamed to confess to this wondering timidity, adult though I am.

It isn't anything to approach imaginative idlers like great painters, or great novelists, or great statesmen, but when it comes to tracing an imagination that has made ghostly traditions, commercial commonplace facts, there is no telling what such a man may do at any moment. Say what you will, Edison has harnessed his imagination to supernatural impulses, and driving them in through one door of his laboratory, has sent them out again at the other end literally reformed and even amusing demons.

No doubt there are scientists and chemists, mechanics and mathematicians in the Edison works that by the very force of their uncompromising training, consider the great inventor as a dreamer, but that is exactly the amazing wonder of him which no knowledge of exact science can explain.

Take the dreamer out of man and you destroy the divining instinct of life, that unseen, unknown land between man and his maker. The miracle of Edison's discoveries are to the scientist desperately reasonable, and to label his exact experiments

as mere vaporings from dreamland, encourages him. Still say what he will, the inception of almost any new invention has appeared first to the inventor in a most visionary stage of development.

Take Edison's own story of the new storage battery which he has just completed, and of which he told me much in detail, he was based upon the inventor's high esteem for the prolific promises there are in nature, for as he said, he could not conceive that nature so generous in all her favors had been mean enough to him, a storage battery to lead and acids. Maybe it is because he had always been so punctiliously chivalrous and just to her in his laboratory, that nature has rewarded him, by lifting her veil to him so often.

Wireless telegraphy had been confined to him by nature 20 years ago, he told me, when the Lohlag Valley road successfully used it in their freight department service. At that time he flashed a message from earth to a kite two miles in the air above. Just at that time he was in tremendous favor with Dame Nature, she gave him an idea for the incandescent lamp, which obliterated for a time his interest in wireless telegraphy.

After the lamp came experimental improvements in automatic telegraph

ply operating at high speeds, when nature drew his attention to the audible sounds produced by the vibration of a stylus he was using in connection with the instruments, to this he applied his knowledge of acoustics and the telephone mechanics, with the result that he produced the phonograph. And so it seems to have been with him all along the line. Instead of feeling as wizards of old have done that nature was a dangerous, awesome specter to be withstood and feared, he has seen her beauties, approached her with confidence, and found that she holds only the most endearing principles for humanity at large.

Edison is not a wizard; he is a sturdy, sunny-souled, hard-boiled son of Ohio, the great Buckeye State.

He has what all great Americans of the present day reveal, especially the temperament of youth. He may sometimes, because it has been forced upon him, fall into an outward semblance of the fictional scientist, the man of abstraction and silent mystery, but get him among old friends, and he will tell better stories and listen to old ones as generously and with as keen a pleasure as ordinary hearty human beings.

Because Edison is a prophet, chosen to advance the power of his fellow men, over-hindering exactitudes,

scarcely warrants that we picture him with any theatrical exaggerations. However, this dramatic flavor has been so liberally mixed with the solid commercial results of the Edison factory at Orange, N. J., that it is as a pretty tinsel veil adorning the business aspect of everything there. Literally, perhaps, it is inevitable, because the main force, the impelling power, the indefinite magic of Edison's works, takes source in the prophetic imagination of Thomas A. Edison, the inventor of his marvels.

It is a place of magical things, achieved by imaginative presence. In spite of two many clever assistants I met at the works, in spite of their exact reasoning, their scientific experience and even their experimental caution, take Edison away and there would be no more wonderwork forthcoming there.

Edison himself expressed the idea this way: "No man of a mathematical habit of mind ever invented anything that amount to much. He hasn't the imagination to do it. I don't know anything about mathematics—can't even do proportion—but I can hire all the good mathematicians I need." And he might have added, "but I can't hire men with logical imagination."

Edison will be exactly 59 years old

next February; he is still a young man, in spite of the pressure at which he has played his life.

In the laboratory buildings, where all experimental labor is done exclusively, there are only a few over a hundred men employed; in the adjoining factory, where the phonograph and the moving picture machines are made, there are over 2,500 employees in the season.

It is in the laboratory that the spell of Edison's imagination is over all, and yet the secrets are open to any technical observer, because there is really no scientific question about them. Edison would most fearfully answer, since it is not the natural evolution of experimental changes that count, so much as it is the character and a certain audacity of imagination in the mind of the inventor, who is conducting them.

Edison works with no apparent executive system. You may hunt all most anywhere for him in the various departments of his laboratory at any time. No one knows how many secrets are fermenting in his brain, nor the sequence of their development. Odd corners, enclosed works in the plain brick buildings of the laboratory, were shown to me as places where he snatched a little sleep when too-absorbed to go home. His head machinist, Fred Ott, prob-

ably the man who is closer to the magic of Edison's achievements than any other technical man, spoke of the period when the phonograph was evolving. "We never left this room, night or day, for weeks, till it was done," he said. "Our meals were sent in and we slept here."

"Afraid the whole thing would go up in smoke," I asked.

"No. We were sure enough, but we wanted to get through—to do it!" Now Fred Ott voiced the germ that Edison had introduced right there.

To do it! To nail the dream together, so that it would never fall apart again. Yes, and to keep it up to date; to inoculate it with the virus of newly applied discoveries, year in and year out, so that it should be not merely a bit of still life, but a progressive energy, alive every minute. Edison himself carried all the weight of constantly impending failures for a triumphant practical value.

He is as tenacious as a bulldog; once he gets hold of an idea, and you can't scold him or coax him to let go. Before he reaches for a thing, he "smells around" thoroughly to see if it's worth while, and, whenever, he fails to get the intended result, he does not blame natural causes or bad workmanship; he just says: "It isn't nature that's wrong; it's me. I'll keep at it till I know more."

There is an experimenting room in the laboratory devoted to the improvement of the phonograph. A. F. E. Wageman, who bears a striking resemblance to Edison himself, is master of ceremonies here. He has surprises to show, if he wishes, that are not yet on the market. I heard one of them under pledge of secrecy. "We know nothing definite about sound," he said. "It evades reason at times and tumbles upon us frequently by accident, but it is still one of the secrets of nature. We are experimenting constantly to get perfect tone. There is nothing now, however, that we cannot record. We had trouble at first with soprano voices, and late with violin and cello solos. We only put cello solos on the market about four months ago. No day is exactly like another. There is a constant though minute atmospheric change going on about us, so we try everything, no matter how absurd it may seem at the time, in an effort to catch nature in a scientific trap." What I heard will not be on the market for a year, Edison's policy is to mistrust a merely remotely aspect of nature till he has adjusted her assurance of its practical truth.

We found Edison in the chemical department of his laboratory. Something in a copper dish was steaming over a blue flame on a work-bench in front of him, and he lay far down in his chair apparently watching it. Some young men in shirt sleeves were quietly occupied in the same room mixing and measuring chemicals.

There is a theory, probably supported by data, that there are times when to approach Edison when in one of these seemingly abstract silences is a breach never to be forgiven. I had heard about this, and so induced Mr. Wageman to advance with me. He may have heard us approach his chair, and he may not, but he did not turn around. Mr. Wageman is a scientist of the physically independent type, so he told him what he wanted.

I was never more impressed with the nonsense I had read about his melodramatic mannerisms, his wizard dignity, and his resemblance to Shakespearean apothecaries than when he jumped from his chair and we met cordially. I have met much more assumption of greatness in celebrities of equal fame, but with fewer practical achievements.

Edison is not a dundified man, he is not stooped-shouldered; he is not slow or ponderous, or technically mysterious. His hair is only just turned gray, and though his trousers were not creased, nor his shoes patent leather, he had that indescribable dignity one finds in a Westerner that a New Yorker has to work hard for.

It is the dignity of power, in restraint.

There is no word that exactly measures the difference between the wave that laps the shore and the wave that is in the mid ocean. One tells of the shallows at a glance; the other of the unfathomable possibilities.

Edison is the sort of Westerner who could ride a scheme till it dropped under him and never lose heart of ultimately finding one that wouldn't drop. He has waiting courage, and no matter how circumstances blind him, he keeps right on feeling his way by little things till they grow big enough for him to see, because what he believes generally will be.

Edison has the habit of mental concentration of clearness, exactness. When he is talking you know that it is in perspective, because he punctuates with sharp, or loud, or softer tones of his voice. He is colloquial in his language; he has no well rounded, conference, no pretty affectations of technical form, and "I don't hear you at once, he pounces on you with a visible 'what?' the perils of a misunderstanding on either side.

He is only slightly deaf, and the talk about his necessity to watch the lips of another to understand him is fictional nonsense.

I asked him what he was doing about the new storage battery. He tossed his head impatiently, while the tolerant smile of a patient man contradicted the first impression, and he began to talk.

"Those fellows out West don't seem to catch on," he began crisply. "Just because those batteries are not all over the United States now, they seem to think I haven't done it. I'll show 'em next spring; they'll be on the market then. I'm building a new factory out here to make 'em, but I didn't want to put 'em on the market till I know they would do the work."

He paused, staring straight ahead, and I waited, as I thought, he was adjusting to make clear, as he habitually has done in his experiments. "I have proven that my storage battery does the work; they are being used in New York on trucks, today, but I limited the number I put out to make the thing experimental. I've been testing over 20,000 off 'em right here in the laboratory, and they're all right now. They can do the work and it means a solution of the crowded traffic problem in all great cities." Another pause came, and he renewed the talk with more vigor.

"People seem to forget that you can't make a battery that is warranted to work right as you can a dynamo. A battery is a thing of chemical action, it isn't a bit of solid machinery. I wasn't going to put out a battery that I couldn't guarantee, that wasn't commercially practical. The problem solved is this: We halve the traffic for vehicles in crowded streets because we cut their length in two when we do away with the horse; then we halve it again by greater speed, which prevents congestion." It was clear that he was a bit sensitive about the criticism of the delay, because it revealed an unfair lack of confidence in a man who has done things.

"I don't usually talk much. I prefer to produce, and when I do so my work will hold good. Why I've been experimenting and perfecting this, just as I have any invention intended for market—Mind—you, an inventor, can make a beautiful thing to show, much quicker than he can perfect a thing that must work. We're very commercial round here," he added, with a shrewd glint of pride and satisfaction in his blue eyes; as he stamped his two feet squarely on the ground in emphatic assurance of this fact.

Once Edison has transformed a dream into a tangible reality he is all business, for he added: "What we wanted this battery to do is now doing in the New York streets—that is, a minimum space, reduced weight, a 40-mile run with a truck capacity of one ton and one charge at a little.

The North-Western line will sell ex-

cursion tickets at reduced rates May

16 to 19, inclusive, limited to return

until May 21, inclusive. Apply to

agents.

Boston Excursions Via the Wash.

The Wash. will sell excursion

tickets to Boston, May 31 to June 9,

via Niagara Falls and direct line, via

Montreal, or via New York, at one

fare plus \$1 for the round trip. Ex-

cursion tickets limited until July 15, 1906.

Write for printed matter and full de-

tails. Agent, 97 Adams St., Chicago.

F. H. Tristram, Asst. Gen.

New Homes in the West.

Over a million acres of land will

be thrown open to settlement on the

Shoshone Indian Reservation August

15, 1906. These lands are reached by

the direct route of the Chicago &

North-Western R'y from Chicago, St.

Paul, Minneapolis, Omaha, and other

points in the Mississippi Valley. Send

two cents in stamps for pamphlets,

maps and full particulars to W. B.

Kniskern, P. M. C. & N. W. R'y

Co., Chicago.

Very Low Excursion Rates to St.

Paul-Minneapolis.

Via the North-Western Line. Excur-

sion tickets will be sold May 23 to

31, inclusive, limited to return until

June 9, inclusive, on account General

Federation of Women's Clubs. Apply

to agents.

Homeseekers' Excursion to the N-W

west, West and Southwest

Via the North-Western Line. Excur-

sion tickets at greatly reduced rates

are on sale to the territory indicated

above. Standard and tourist sleeping

cars, free reclining chair cars and

"The Best of Everything." For dates

of sale and full particulars apply to

agents Chicago & North-Western R'y.

Very Low Rates to Des Moines, Ia.

Via the North-Western Line. Excur-

sion tickets will be sold on six dates,

May 14, 15, 16, 17, 21, 23, limited to

return until May 31st, inclusive, on

account of General Assembly, Presby-

terian Church. Apply to agents Chi-

cago & North-Western R'y.

Very Low Excursion Rates to New

Haven, Conn.

Via the North-Western Line. Excur-

sion tickets will be sold on conven-

tion dates with favorable return lim-

its, on account of annual convention

national council. Knights of Colum-

bus, to be held June 2 to 9. Apply

to agents.

Low Priced Atlas

An up-to-date atlas of the northwest

and the orient for \$1. The Northwest

Pacific Railway company will send

an atlas of the northwest, very com-

plete in detail, to anyone upon receipt

of price named.

This is a recent compilation, and

data, maps, illustrations, etc., are

reliable and from best sources. Sent

prepaid on receipt of price.

Agent, St. Paul, Minnesota.

FOR THE STUDY
OF HYDRAULICSNEW LABORATORY AT STATE
UNIVERSITY COMPLETED.

EQUIPPED FOR EXPERIMENTS

Turbines, Weirs, Filters and Centri-
fugal Pumps—General News of
the Institution.Madison, Wis.—The most important
addition recently made to the college
of engineering of the University of
Wisconsin is the new hydraulic
laboratory, which is now practically
completed and is to be used by stu-
dents for experimental purposes. The
laboratory is well equipped for inves-
tigation of problems of water power
and water supply, the importance of
which in commercial municipal, and
sanitary engineering is rapidly in-
creasing. Students interested in these
phases of engineering may now study
and test the principles of hydraulics
involved in water power, swamp
drainage, irrigation, sewage disposal,
and similar practical subjects. The
new hydraulic laboratory at the uni-
versity has been established in re-
sponse to the increased demand for
students especially trained in hydraulics.Development is phenomenal.
The rapid development in all lines
of hydraulics during the past few
years has been phenomenal. Since it
has become possible to transmit elec-
tricity for a considerable distance,
the water power of rivers and streams
heretofore useless because inaccess-
ible has been employed for commer-
cial and manufacturing purposes. The
growth of large cities has made the
questions of pure water supply and
sewage disposal of vital impor-
tance. The growth of population and
increased land values have led to the
consideration of methods of reclaim-
ing marsh lands by drainage, and of
acid and semiarid tracts by irriga-
tion. All these matters have called
attention to the necessity of a thor-
ough knowledge of the principles of
hydraulics and a more exact and care-
ful investigation of hydraulic phe-
nomena on the part of those engaged
in solving the important commercial
and sanitary problems.

Has Good Location.

The new hydraulic laboratory is
located on the shore of Lake Mendota
near the college of engineering and
immediately adjoining the university
pumping station and tank house. The
location is an excellent one since an
unlimited quantity of water is avail-
able. The university pumping station,
together with the storage reservoir
on the bluff of the lake fifty feet
above the laboratory, furnish the nec-
essary water for experimentation.The building is constructed of re-
inforced concrete. It is 48x98 feet,
and three stories high including the
basement, which is one and one-half
feet above the level of the lake. In
the basement are located an engine
room and a large Morris centrifugal
pump, and a number of measuring
tanks, together with the laboratory
for special work and the head and
tail races extending the entire length
of the building.

Large Volume of Water.

The large centrifugal pump, with a
thirty-inch suction and thirty-inch dis-
charge pipe, has a capacity of 25,000
gallons per minute. The water is
pumped into the receiving chamber
from double-head gates open into the
raceway extending almost the en-
tire length of the building. In the
raceway, which is ten feet wide and
ten feet deep, a volume of from 25,000
to 35,000 gallons of water per minute
will be available for experimental
purposes. In this channel the mea-
surements of flow may be made with
various depths of water and with var-
ious temporary restrictions. A small
channel four and one-half feet wide
and deep has been constructed paral-
lel to and adjoining the large one for
use in connection with channel ex-
periments on a smaller scale. Below
this is a thirty-inch circular concrete
conduit in which the phenomena of the
flow in closed channels may be studied.

Four New Turbines.

A large turbine with a thirty-inch
wheel which will develop fifty horse-
power, is located at the west end of the
ten-foot channel from which it re-
ceives its water supply. After pass-
ing the wheel the water is discharged
into a tail race ten feet in width in
which is arranged a standard weir.
This weir, in connection with the
prony brake on the determination of
quantities, velocity, and efficiencies of
the flow of water under various con-
ditions. Three smaller turbines are
set in a separate well, and receive their
waters through separate smaller
channels.

Filters For Sanitary Work.

For the study of the purification of
water by filtration, four water filters of
different types have been installed
in the new laboratory. Two of these
filters are of the slow sand type, and
consist of tanks six feet in diameter
and eight feet deep. The filter equip-
ment also includes a new Jewell
gravity filter, and a mechanical filter
with Norwood strainers, presented by
the Norwood Engineering Co. These
filters have been fully equipped for
experimental work, and afford excel-
lent opportunity for the study of
various methods of filtration of water
under conditions that prevail in mu-
nicipal and sanitary engineering.

Two Hydraulic Rams.

The new laboratory has been pro-
vided with two hydraulic rams. One
of these has been especially designed
for experimental purposes, with a
view to making possible a careful
study of valves and air chamber ca-
pacities in relation to the efficiency
of a ram. The new ram, which will
have a four-inch drive pipe, will make
possible experiments on a large and
more satisfactory scale than has been
possible heretofore.

Two tanks are provided for the de-

termination of the friction of water

flowing through gravel or sand. A

larger tank will also be constructed

for the study of the laws of ground

water, through sand and soils and the

principles controlling the operation of

wells.

Experimental Apparatus.
Apparatus has been provided for
the study of the flow of water in
straight and curved pipes and hose
of various sizes and materials, also
for the investigation of losses due to
sudden expansion and contraction and
to valves and other forms of restricted
passages. The laboratory is also
supplied with various reciprocating
pumps, centrifugal pumps, vacuum
pumps, jet pumps, and various water
meters, including those of the disc,
piston and Venturi types. A large as-
sortment of accurate apparatus for
the measurement of quantities, veloci-
ties and pressures, both in open and
closed channels, is available in the
laboratory. Arrangements have been
made for the careful and accurate in-
vestigation of various types of instru-
ments and of the methods used in
conducting hydraulic experiments.Demonstration Lectures.
On the upper floor of the laboratory
is a large lecture room provided with
apparatus by means of which many
simple forms of experiments can be
performed before the class in theoret-
ical hydraulics. It will thus be pos-
sible by means of actual and visible
demonstration to emphasize and im-
press on the minds of the students the
general principles of hydraulics. By
this radical improvement in the
method of teaching theoretical hy-
draulics, it is believed that the infor-
mation can be conveyed to the stu-
dents in a more thorough and effec-
tive manner. The laboratory work in-
cludes experiments familiarizing the
students with the application of the
most important principles encountered
in theoretical work.

Chance For Research.

In the new laboratory special at-
tention will be given to advancing re-
search work. It is intended to direct
the students' thesis work into lines
in which further information is de-
sired, and from which valuable results
can be obtained. Results of interest
will be further investigated, checked,
and extended, with a view to publish-
ing the conclusions whenever they are
of general interest and importance.The construction of the laboratory
marks a great advance in the oppor-
tunity and character of investigation
in hydraulics in the university, and
it is undisputed that the opportunities
for research work will have consid-
erable influence in the advance of
knowledge of this important subject.

Self-Supporting Students.

Secretary E. F. Riley of the regents
of the University of Wisconsin has
just published a pamphlet descriptive
of ways and means employed by self-
supporting students in earning their
way through the university. The
pamphlet, which was prepared by a
student of the university who investi-
gated the subject recently, gives a
complete summary of the opportuni-
ties for obtaining work by students
who desire to support themselves
during their university course, and is
intended for distribution to prospec-
tive students interested in the subject.
The statistics given in the pamphlet
show that the number of self-support-
ing students at the University of
Wisconsin is larger than ever before,
and that the demand for student help
by the faculties of Madison has often
exceeded the supply.

Name New Magazine Editors.

The board of editors of the Univer-
sity of Wisconsin Literary Magazine
for the coming year has just been
elected, and consists of the following
students: Editor-in-Chief, Walter S.
Underwood, '07, Milwaukee; associate
editors, Lucian H. Cary, '08, Madison;
Cora C. Hinkley, '07, Milwaukee;
John V. Milne, '08, East Troy; Har-
ry F. Parker, '07, Hudson; Irving P.
Schauss, '07, Milwaukee. The elec-
tions for the board are made on the
basis of merit of the contributions
submitted and published in the Liter-
ary Magazine during the last year.

Intercollegiate Photography.

The annual exhibition of the Inter-
collegiate Association of Camera Clubs,
which consists of Harvard,
Pennsylvania, Dartmouth, and the
University of Wisconsin, will be held
at the library of the University of
Wisconsin May 19 to 26. Some 130 of
the best photographs submitted by the
members of the camera clubs of the
four institutions will be included in
the exhibition. The Wisconsin
Camera Club is represented by twenty-
one photographs. Although a large
variety of subjects, including the
first intercollegiate exhibition
which the University of Wisconsin
has entered, the club was a close com-
petitor for second place, and won second
individual prize.

Lectures on Home Economics.

Mrs. Ellen H. Richards, professor
of sanitary engineering in Massachu-
setts Institute of Technology, has been
delivering a series of special lectures
under the auspices of the department
of economics of the University of
Wisconsin. The series has included
talks on the "Progress in the Teaching
of Domestic Science," "Standards of
Living," and "The Responsibility of
Schools for Public Health."

University Art Exhibition.

An exhibition of paintings and etch-
ings by well-known artists is being
given by the Madison Art association at
the University library. The exhibit
includes a collection of twenty-five
etchings by Whistler, and paintings
by William M. Chase, Childe Hassam,
Howard Logan Hildebrand, Albert L.
Grall, Cullen Yates, and Frederick
Ballard Williams.Many ills come from impure blood.
Can't have pure blood with faulty di-
gestion. Laxative and sluggish bow-
els. Burdock Blood Bitters strength-
ens stomach, bowels and liver, and
purifies the blood.Disfiguring skin eruptions,
itching, annoy drive one wild.
Dorcas Ointment brings quick relief
and lasting cures. Fifty cents at any
drugstore.After a heavy meal, take a couple
of Doan's Regulents, and give your
stomach, liver, and bowels the help
they will need. Regulents bring easy,
regular passages of the bowels.Everybody's friend—Dr. Thomas
Electric Oil. Cures toothache, car-
ache, sore throat. Heals cuts, bruises,
scalds. Stops any pain.

Very Low Rates to Boston, Mass.

Via the North-Western Line, for tick-

ets, to be sold June 2, 3 and 4, with

favorable return limits, on account

of American Medical association

meetings. Apply to agents.

STUDY UP EDISON

Continued From Page Nine

more than one-half it costs to keep
a horse vehicle running now. I've
done it and next spring our factory
here will be making them."Then he returned to the impatience
of the public again: "They cannot ex-
pect me to finish a job like this as if
it were a bit of machinery. Why,
even a locomotive has contrary
streaks, and that is plain steam, not
a complicated chemical action like a
battery. That's why it has taken
time to make sure." And he was sure
there was no mistake in the shake
of his head, the nervous clasp of the
hands stretched at arms' length be-
hind it. Confident that it was done,
he felt at liberty to recall the dream
stage of this, his latest invention:"You know, it happens sometimes
when things get slow around here that
I suffer from ennui," he said, with a
semi-comic regret in his voice,
which set us all laughing, because
Edison is an inexhaustible working
battery himself. "Well; when I get
one of these spells I generally go in-
to things pretty thoroughly, and al-
though I was sure that a stronger bat-
tery could be made (because I didn't
think Nature could be so mean as to
confine herself to a lead battery), the
important question in my mind was to
know just exactly what was required
of that battery. So I had a complete
census of vehicles taken in New York,
a report of the congestion and the
average speed. I saw at once that if
I stored a battery, could be made
there would be use for it," and he
paused with a whimsical smile. "Of
course, the question of storing weight
disposed of the lead battery. I knew
that some new combination
of chemistry eliminating lead must be
found. So I began experimenting for
a long time with no result. Then one
day there came just a nibble, just a
little bit of something; then that
disappeared, and for a long time I got
nothing. Still I kept at it, little
by little coaxing it along, but no re-
sult. I felt perfectly sure that Nature
held the secret, and that it wasn't
her fault. 'It's me,' I said to myself,
'not Nature—that's wrong.' And so it
was, for at last I got it, negative
and positive, without lead. But after
that so delicate and mysterious chem-
ical action that conditions would alter
and make everything unreliable. We had
some trouble with them after we first
put them out in New York. Couldn't
understand it. We found out that, in-
stead of using distilled water, the driv-
ers, unable to find any had gone to drug
stores and purchased carbolic water,
the gases of which partly destroyed
the action of the rest. There is no
doubt I can reduce it to half its pre-
sent size, but it's small enough
now for all purposes."The phonograph, at least, is com-
plete, I suggested.
"Oh, no! The phonograph is a use-
ful thing, and it's wonderful to see
what pleasure it has given; it is the
poor man's music, but we are ex-
perimenting, improving, discovering
new things all the time in it."And that is just the secret of
Edison's success. He never reaches
the final word of discovery. His im-
agination is always luring him into
byways that no one suspects. In ad-
dition to his better-known patents
granted in connection with the devel-
opment of the electric lamp, the tele-
graph, telephone, the ore-milling ma-
chinery, and storage batteries, his in-
ventions include vote recorders, typewrit-
ers, electric pens, vocal engineer-
ing, addressing machines, methods of pre-
serving fruit, castiron manufacture,
wire drawing, electric locomotives,
moving-picture machines, the making
of plate glass, compressed air appar-
atus and many others.All this shows clearly that it is not
so much the result of wizard's magic
as it is a plain, ceaseless genius for
work, the imaginative audacity of a
poet and hard-headed business which
combine to make the man Edison.

PENDENNIS.

LATE PATENTS.

R. W. Bishop, patent attorney,

Washington, D. C., reports the issue

of the following patents on the 15th

instant to residents of Wisconsin:

No. 820,400. Trailing truck. J. F. De

Voy, Milwaukee.

No. 820,408. Vaporizer for engines.

Bert Garlius, Madison.

No. 820,414. Burning cement clinker.

H. E. Deherty, Milwaukee.

No. 820,508. Sight-feed lubricator. Fred-

erick Leonard, Sheboygan.

No. 820,522. Paper-stock-refining engine.

H. G. Saecker, Appleton.

No. 820,531. Wheel-holder. O. G. Klein,

Barron.

No. 820,593. Molding flask. David Mc-

Lain, Milwaukee; assignor of one-

half to N. A. Christensen, same place.

No. 820,601. Garden implement. G.

W. Robinson, Lodi.

No. 820,620. Chair-iron. H. W. Bolens,

Port Washington.

No. 820,626. Explosive-engine. J. F.

Crowley, assignor of three-fourths to

Marguerite Pauli, same place.

No. 820,667. Harvester-reel. G. A. Pad-

dock, Beaver Dam.

No. 820,698. Securing device for shoe-

laces. B. G. Buchanan, Ashland.

No. 820,713. Credit system apparatus.

J. O. Greenwald, Milwaukee.

No. 820,749. Turbine bottle-washer. T.

L. Valerius, Port Atkinson, assignor to

Creamery Package Mfg. Co., Chi-

cago.

No. 820,953. Concrete-mixer. H. W.

Hubbard, Milwaukee; assignor of

three-fifths to Logemann Bros. Co.,

same place.

Sunday School Workers.

Watertown, S. D., May 13.—An at-

tractive program of music, addresses

and discussions has been arranged

tion, which began a three days' ses-

sion here today. The delegates pres-

ent come from all parts of the state

NEW GAS LIGHT CO.

MINORITY REPORT SHOWN TO BE VERY FAULTY NOW THAT MAJORITY DECIDES

The Panama Canal Question Decided By The Senate Inter-oceanic Committee.

The following is the majority report of the Senate Inter-oceanic committee: That the earthquake which destroyed San Francisco was an important factor in determining the vote of the senate committee on inter-oceanic canals in favor of a sea-level type is apparent from the fact that a feature of the majority report is a discussion of the effect such an earth wave might have on locks and dams. The majority report in favor of a sea-level canal was submitted today by Senator Kittredge. On the subject of danger from earthquakes on the isthmus and the possible effect on the two types of canal proposed, the report says:

"The recent calamity that overwhelmed one of our great cities has caused many forebodings. The assertion that any particular spot in the tropics is exempt from all danger from such convulsions of nature as recently visited California or wrought great havoc near Charleston, S. C. in 1886, or changed the face of nature in southeastern Missouri, near the beginning of this century, would not be hazarded by any wise man. That the isthmus of Panama is not exempt, conclusively appears and we can have no guaranty that the canal zone will in the future be exempt from such disaster.

"The canal structures that would be most exposed to injury by the passing of an earth wave or violent movement of the earth's surface are the locks proposed by the minority, whose walls, many hundreds of feet long at Gatun would, at least some of them, be more than 75 feet high and entirely unsupported on one side save for a part of the height by water. If these walls should be moved at all the natural and probable result would be in their leaning and so prevent the closing of the gates—an injury for which a suggestion of extra gates on hand would be useless, for no one could guess the extent of the movement. But the most likely effect of such shock would be the fracture of these locks, in repairing of which much time—months or years—might be required, and thus cause interruption of traffic or the abandonment of the canal.

"The minority suggests that the dam at Gamboa, included in the plan of the board, would be as likely to sustain injury from such convulsion as the structure above mentioned. This is not the fact. The Gamboa dam is built on a solid rock foundation, reinforced with strong walls

and buttressed at either end with walls of rock. It is a structure the least likely to be affected of any superimposed on the earth's surface and no record is found in any similar structure being permanently injured under similar circumstances. The side slopes of the Gamboa cut would be no more likely to be disturbed than are the nearly vertical slopes near the divide, that have never been affected.

"An earth dam on an alluvial base, as proposed by the minority, might be fissured if the earthquake passed the locality, and if a crack in the dam or its base should open, the dam would go out, the lock drain, and the canal be ruined.

"At San Francisco where the water pipes were broken the disaster was greatly augmented by this cause, for the water could not be held in the pipes and directed on the flames. What would happen to the aqueduct, conduits, pipes and valves, buried in the concrete walls, used for filling and emptying the locks, cannot be well conjectured.

"After reviewing the legislation and the messages of the President on the subject of the canal, the report says that it is due to the executive branch of the government that the uncertainty confronting the President as to his powers in the premises be settled and disposed of affirmatively, once and for all, by the only national authority competent to pass upon the question—the national legislature.

"The division among experts as to the best type of canal is treated by the report, which says that the conclusion has been reached that the following propositions are irrefutable: that the ideal canal is one at sea level; that its construction would be attended with no more, and probably with less hazard than one with locks and dams on doubtful foundations; that the sea level canal is safer and more convenient than one with locks; that it would take but little longer time to build; that it is the simpler and the more economical in operation and maintenance.

"The estimates of the minority and the majority of the board of consulting engineers on the time that would be required to excavate the different types of canal are reviewed and the majority report concludes that the sea level canal would not require more than two or three years more than the lock type.

Risks encountered in the operation of the sea level canal are made light of by the report, which says, the Gamboa dam would be ready to control the Chagres floods before the Gamboa excavation is half finished and the balance of the excavation in the prism and below sea level could go on without interruption. When the Chagres is subdued and controlled and the sea level canal made its use will be attended with no more risk than equal sailing distance in the oceans.

A chapter of the report is devoted to the locks and dams proposed by the minority report of the consulting engineers, and these are asserted to be an element of danger. The various accidents to which such mechanism might be subject are recounted and the report asserts that these hazards can be avoided by the small sacrifice of time necessary to the construction of the sea level canal.

The claim is made by the report that ships of all classes could be passed through the sea-level canal in eight hours and that half that time would be consumed in passing ships through locks alone. The cost of annual maintenance is estimated at \$1,840,000 for the sea level, and \$2,330,000 for the lock type.

Discussing the advantages of the sea level canal to the country controlling it, in time of war, the report says: "If free from all obstacles to quick transit 100 warships of average size, moving in one direction, route clear could be passed from ocean to ocean in less than a day.

"All naval commanders and commercial masters of the great national and private vessels of the world are almost to a man opposed unalterably to the introduction of any lock to lift vessels over the low summit that nature has left for us to remove."

The majority argues that an enemy could destroy a lock canal much easier than a sea level canal with explosives.

The ultimate final cost of the sea level canal as estimated by the majority is \$250,000,000, while the cost of the lock canal is regarded as uncertain. The minority of the board of consulting engineers estimated the cost at \$139,705,200, and to this the majority says should be added the interest on the extra cost of maintenance; the expenses of clearing the titles to the 118,000 acres of land that would be submerged by the central lake proposed by the lock plan which it is estimated would make the total cost at least \$190,000,000. The cost of transforming the lock plan into a sea level canal, after the former is completed, is estimated at \$200,000,000.

In conclusion the majority says: "Your committee feels entirely confident that the board of consulting engineers selected to study this problem has submitted a plan that responds in every respect to the conditions stated above and that the sea level canal can be realized in 10 or 11 years at a cost not to exceed \$60,000,000 above that required for the construction of the multi lock canal proposed by the minority."

ELGIN BUTTER MARKET

Elgin, Ill., May 14.—Output, 14,000. Butter firm at 20c.

Big Auto War Now Likely

Nomination of Hemery as Driver In French Grand Prix Race Angers Officials of American Association--He Is Under Suspension Here.

Auguste Hemery, the French automobile driver who was placed under suspension for one year for insubordination at the Ormond-Daytona beach speed carnival in January, has been selected by a well-known company as one of its three drivers in the French Grand Prix race, to take place on June 26 and 27.

Hemery's term of suspension will not expire until the end of January next, and there is considerable anxiety in American Automobile Association circles as to whether or not the Automobile Club of France will permit the recalcitrant driver to take part in the big contest.

The American officials are indignant at his nomination for the race. It is allowed to go in it there will probably be a severance of relations between the two bodies.

Either that or the A. A. A. must face internal dissension, because the managers of the Florida East Coast association, one of its most important affiliations, have declared unequivocally that Hemery's punishment must go to the limit set. Hemery's offense, they declare, was aggravated; the more so because it was totally uncalled for. The Florida association conducts the Ormond speed carnival under sanction from the A. A. A., and representatives of the parent body have supervised the racing during the past two years.

There has been no opportunity to judge of the probable attitude of the French racing authorities in such a case as this for the reason that Hemery is the first driver to place him-

AUGUSTE HEMERY.

self under the ban of the A. A. A. The A. A. A. was prepared to uphold the suspension visited on Hemery for unbecoming conduct and language in the last Florio cup event in Italy. Had he failed of restoration to good standing he would not have been allowed to compete in the Vanderbilt cup event. It would appear only consistent, therefore, that the European governing bodies should respect the rulings made on this side.

Three makers have already entered for the Grand Prix race. Each firm will start three cars, and M. Darracq, in addition to Hemery, has selected Wagner and Henriot. Heath, winner of the first Vanderbilt race, will drive a car, as also will Teste and Tart. Baras, Lebrun and Bariller are three other drivers already nominated. Baras is an old racing man. Lebrun and Bariller are practical mechanics of the class that produced Demogot and other successful new drivers.

The rules for the Grand Prix have been finally made up, and all that remains is to get government permission to use the Sarthe circuit on June 26 and 27. This would probably have been arranged but for the collapse of the Rouvier cabinet, which necessitated taking up negotiations with the new Sarthe ministry. The previous minister of the interior was in favor of the race, and it is expected that no obstacles will be placed in the way.

Each manufacturer will have the right to enter a maximum of three cars. The entrance fee has been placed at \$1,000 for each car. The driver may be changed on any car for the second day and the mechanic as often as desired along the route. Any car failing to cover the first day's route within four hours of the first car to finish must be withdrawn. The order of starting on the first day will be decided by draw, and the cars will be sent away at intervals of one minute.

Nancy King In Foil to Crescens.
The black mare, Nancy King, 2:13 1/4, T. B. Tucker of Toledo, O., winner of the 1904 Gold Medal of the Denver Driving club and champion of Toledo Driving club, trotters seasons of 1904 and 1905, is in foal to Crescens, 2:02 1/4. She holds the Toledo track record for matinee performers.

John L. Sullivan has recovered his voice and says he wants to fight Jim Jeffries.

Guarding Jockeys.

Why Detectives Are Now Employed to Watch Eastern Horse Pilots.

Officials of the Jockey club, the ruling eastern turf organization, now employ detectives to watch the jockeys so as to prevent interference with them or attempts at bribery by designing persons, such as gamblers and touts. This new move has aroused a great deal of comment, and good results from it are looked for by the Jockey club stewards.

This move is the direct outcome of many scandalous stories of last season which connected the names of prominent owners with those of jockeys. The horsemanship displayed by a few of the leading jockeys, at times was so crude and far below the real ability of the boy that the stewards

DETECTIVE IN JOCKEY'S DRESSING ROOM.

were not satisfied with the explanations forthcoming from the owners that it was merely a matter of poor judgment, and investigations were set on foot which convinced the officials that there was an ulterior motive behind many defeats of the best horses.

No man is now permitted to converse with the boys on any subject when once the rider is inside the grounds of the race courses. The boys' under engagement to ride must report at 1:30 p. m. every horse that they have got to mount on during the afternoon. If they are to ride in the six races they will not be permitted to leave the jockey room or the enclosure of the scales at any period except to go into the paddock to mount their horses. This rule is imperative and so stringent that no relative, not even a father or mother, will be permitted to talk to a rider. Many of the jockeys have as managers their fathers or brothers. It is the duty of their relatives to make the engagements for the boys, but once the arrangements are completed neither fathers nor brothers will be allowed to talk with them.

If any owner is in quest of a jockey and he has not already secured him prior to the race he may, by looking over a list of names which are conspicuously posted near the scales, make a selection of a desirable rider. If he should select one and that boy has no mount in the particular race he may on application to the clerk of the scales tell his quest and engage the boy to ride his horse.

The jockeys are under supervision from the time they enter the grounds until they leave. There is a corps of Pinkerton detectives in plain clothes always hovering around the executive buildings, in which are located the weighing and the jockeys' dressing rooms. Besides these special policemen, there are two other officers who are always on hand looking after the riders. These are uniformed policemen. One is stationed in the jockeys' dressing rooms and the other at the scales. They never let a rider out of their sight and always check him and any stranger from conversing together.

This supervision of the police over the jockeys is not confined merely to

JOCKEY MILLER ESCORTED BY A PINKERTON.

the race track. Some boys who are under suspicion by the officials are shadowed from morning until they are in bed, and even when they have retired a race track sleuth guards them and takes note of all the men who enter the jockeys' houses. It by any chance a bookmaker or a clerk who is known to be in touch with a bookmaker meets a jockey or holds conversation with him the incident is noted, and the report is sent to the stewards in control.

How Yanks Won In the Olympics

Willie West, In Mixed Metaphors, Tells of Uncle Sam's Crushing Defeat of the "Europeans." List of Events In Which Americans Scored.

By WILLIE WEST.

The sweeping victory of the team of American athletes at the Olympic games in Athens is just now the talk of a half dozen nations. Wow, but they were a swift bunch, those Yankee lads! They took everything that wasn't nailed down in the shape of prizes, even after having three good men disabled, two on board ship and one, Murtha Sheridan, during the games.

Oh, I guess Uncle Samuel can go some. He wears no hoplons and can carry any old kind of a weight. Every time he went to the bat at Athens he knocked a home run and sent three men in ahead of him. This paragraph may contain a few "mixed metaphors," but any American who can't straighten them out should join the Down and Out club.

England's famous swimmers and long distance runners blew up in the stretch and faded away. Greece's twenty-five mile gallopers were nailed to the tracks; Britain's boastful sprinters wobbled and broke their gait in the back stretch, did the ascension act at the three-quarter mark and hove in sight of the distance pole just as the Yanks collided with the finish wire. Europe's great jumpers sliced into the tall grass at the first hole, pulled over out to a sandy lie at No. 2 and disappeared in a water hazard at No. 3 just as our boys puffed nicely into the eighth hole and won.

In the weight events the "Europeans" yawned sloppily to leeward, lost their balloons, jibed overboard and fouled their spinnaker boom; tumbled on the run home.

In the 1,500 meter walk the foreigners ducked Uncle Sam's right swing, countered to the atmosphere with a wild jab and butted headlong into his left hand wallop to the point of the

J. DELIGHTBODY OF CHICAGO UNIVERSITY.

jaw that shut off the scenery for half an hour. When they came to the ambulance was waiting.

And so the story might be continued. The loss of the Marathon race was about the only severe blow to the Yanks, but we'll win it next time.

Events in which Americans scored points were as follows:

100 Meter Swimming Race.—Won by C. M. Daniels, New York A. C.; De Halmy, Hungary, second; Healey, England, third; Darbyshire, England, fourth. Time, 1 minute 23 seconds.

Free Style Discus Throwing.—Won by Martin J. Sheridan, Irish-American A. C.; New York; Giorgantzas, Greece, second; Japponen, Finland, third. Distance, 41 meters 45 centimeters.

Standing Broad Jump.—Won by Ray C. Ewry, New York A. C.; M. J. Sheridan, Irish-American A. C.; New York; second; Lawson Robertson, Irish-American A. C.; New York, third. Distance, 3 meters 20 centimeters.

100 Meter Running Race.—Won by Archie Hahn, Milwaukee A. C.; Ray C. Ewry, New York A. C.; second; Nick Barker, Australia, third. Time, 1:12.5 seconds.

Throwing the Stone.—Won by Giorgantzas, Greece; Martin J. Sheridan, Irish-American A. C.; New York; second; De Halmy, Hungary, third. Distance, 19 meters 52 centimeters.

Running Long Jump.—Won by Myer Prinstein, Irish-American A. C.; New York; P. O'Connor, England, second. Distance, 7 meters 23 centimeters.

100 Meter Walking Race.—Won by George N. Bonning, Irish-American A. C.; New York. Time, 1 minute 12.45 seconds.

400 Meter Running Race.—Won by Paul W. Pilgrimage, New York A. C.; Lieutenant H. Halswell, England, second; Nigel Barker, Australia, third. Time, 5:15 seconds.

1,500 Meter Running Race.—Won by J. D. Lightbody, Chicago university; J. McGough, England, second; Holstrom, Sweden, third. Time, 4 minutes 12 seconds.

Running High Jump.—Won by C. Leahy, England; Goenecy, Hungary, second; H. W. Kerrigan, America, third. Height, 1 meter 73 centimeters.

400 Meter Race.—Won by R. G. Leavitt, Williams college, Williamstown, Mass.; A. H. Healey, England, second; Dunke, Germany, third. Time, 1:01.5 seconds.

800 Meter Running Race.—Won by Paul H. Ellerman, New York A. C.; James D. Lightbody, Chicago university, second; Lieutenant W. Halswell, England, third. Time, 2 minutes 14 seconds.

Marathon Race.—Won by William S. Herring, Hamilton, Ontario; Swamberg, Sweden, second; W. A. Frank, Irish-American A. C.; New York, third. Time, 2 hours 51 minutes 23 seconds.

The American score reached 89 points by the successes of the final day, with Sweden our nearest competitor.

OUR GREAT MAY SALES NOW IN PROGRESS

Every stock throughout the store will contribute its quota of special values, and values that are typical of this store. We made vigorous preparation for our May Sales over a month ago, and now the goods with their plainly marked prices await your commands. Your special attention is called to the unusual showing and value giving in SHOES, MEN'S FURNISHINGS, BOYS' AND MEN'S CLOTHING, WOMEN'S UNDERWEAR AND HOSIERY, WASH DRESS GOODS, WAISTS AND SKIRTS, CURTAINS AND CURTAIN MATERIALS, WALL PAPER AND PAINTS. Our GROCERY, HARDWARE and CROCKERY DEPARTMENTS HOLD BIG INDUCEMENTS FOR YOU. You must inspect these values to fully appreciate them. Sales will continue during all this month.
